Carcle & ASX:CDX

Company Overview

Craig Cooper - Chief Executive Officer Niall Cairns - Executive Chairman

OUR MISSION

To reduce the global impact of cardiovascular disease.

CardieX technology in over a billion homes and clinics worldwide.

KEY COMPANY HIGHLIGHTS

Core technology measures risk & vital signs for arterial & vascular disease.

A world-leader in measuring arterial stiffness and central blood pressure.

World Leading "cuffless" medical sensor technology.

Only FDA-cleared non-invasive measurement of arterial health.

On track for the release of multiple new devices (FDA 'fast track' clearance to be obtained) in 2021 targeting key new markets.

Significant ecosystem of new partnerships and licensing revenue.

Substantial patent, trademark, and IP portfolio.

WE'RE SOLVING A GLOBAL PROBLEM

Cardiovascular (CV) disease is the #1 Killer of humans globally ¹ Incidence rate continues to rise

Current blood pressure (BP) monitoring solutions do not accurately identify or prevent CV risk

100 YEAR OLD TECHNOLOGY Global regulatory and policy support calls for more accurate diagnosis of heart diseases based on arterial stiffness.

THE LANCET

Traditional blood pressure monitors do not measure a specific **individual's risk** for hypertension, cardiovascular disease, and other health disorders.

OUR MARKET

We're focused on the largest health technology markets - cardiovascular & arterial disease and wearable remote patient monitoring.

Significant addressable market

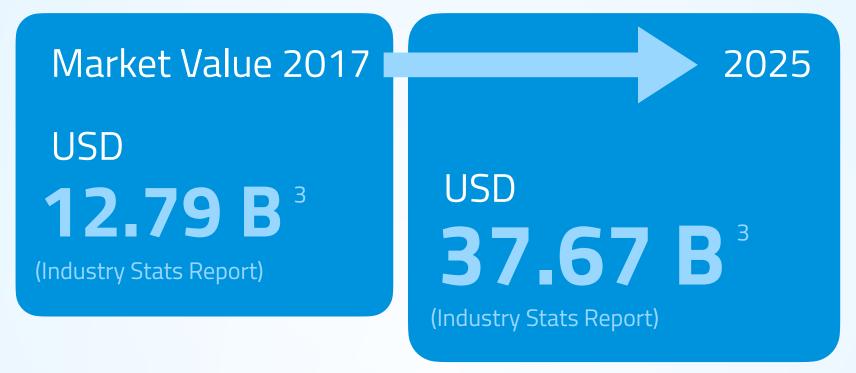

1.3B Global Hypertensives ⁶ (USA 46% of adult population).

1M+ USA based physicians and clinicians.

Global Blood Pressure Monitoring

Market Value 2017 2025 USD USD 1.04 B² (Fortune Business Insights) (Fortune Business Insights)

Medical Wearables Market

Digital Health

Market Value 2019 2025 USD USD 103 B (Valuates Reports) (Grand View Research)

Current products cover only a small percentage of our total addressable market - specialist clinicians (cardiologists, nephrologists), researchers, and clinical trial services.

Future product portfolio expands our technology into the consumer/home, digital, wearable, hospital, and general clinician markets through a mix of company owned products/licensing/OEM partnerships - all "Powered by ATCOR".

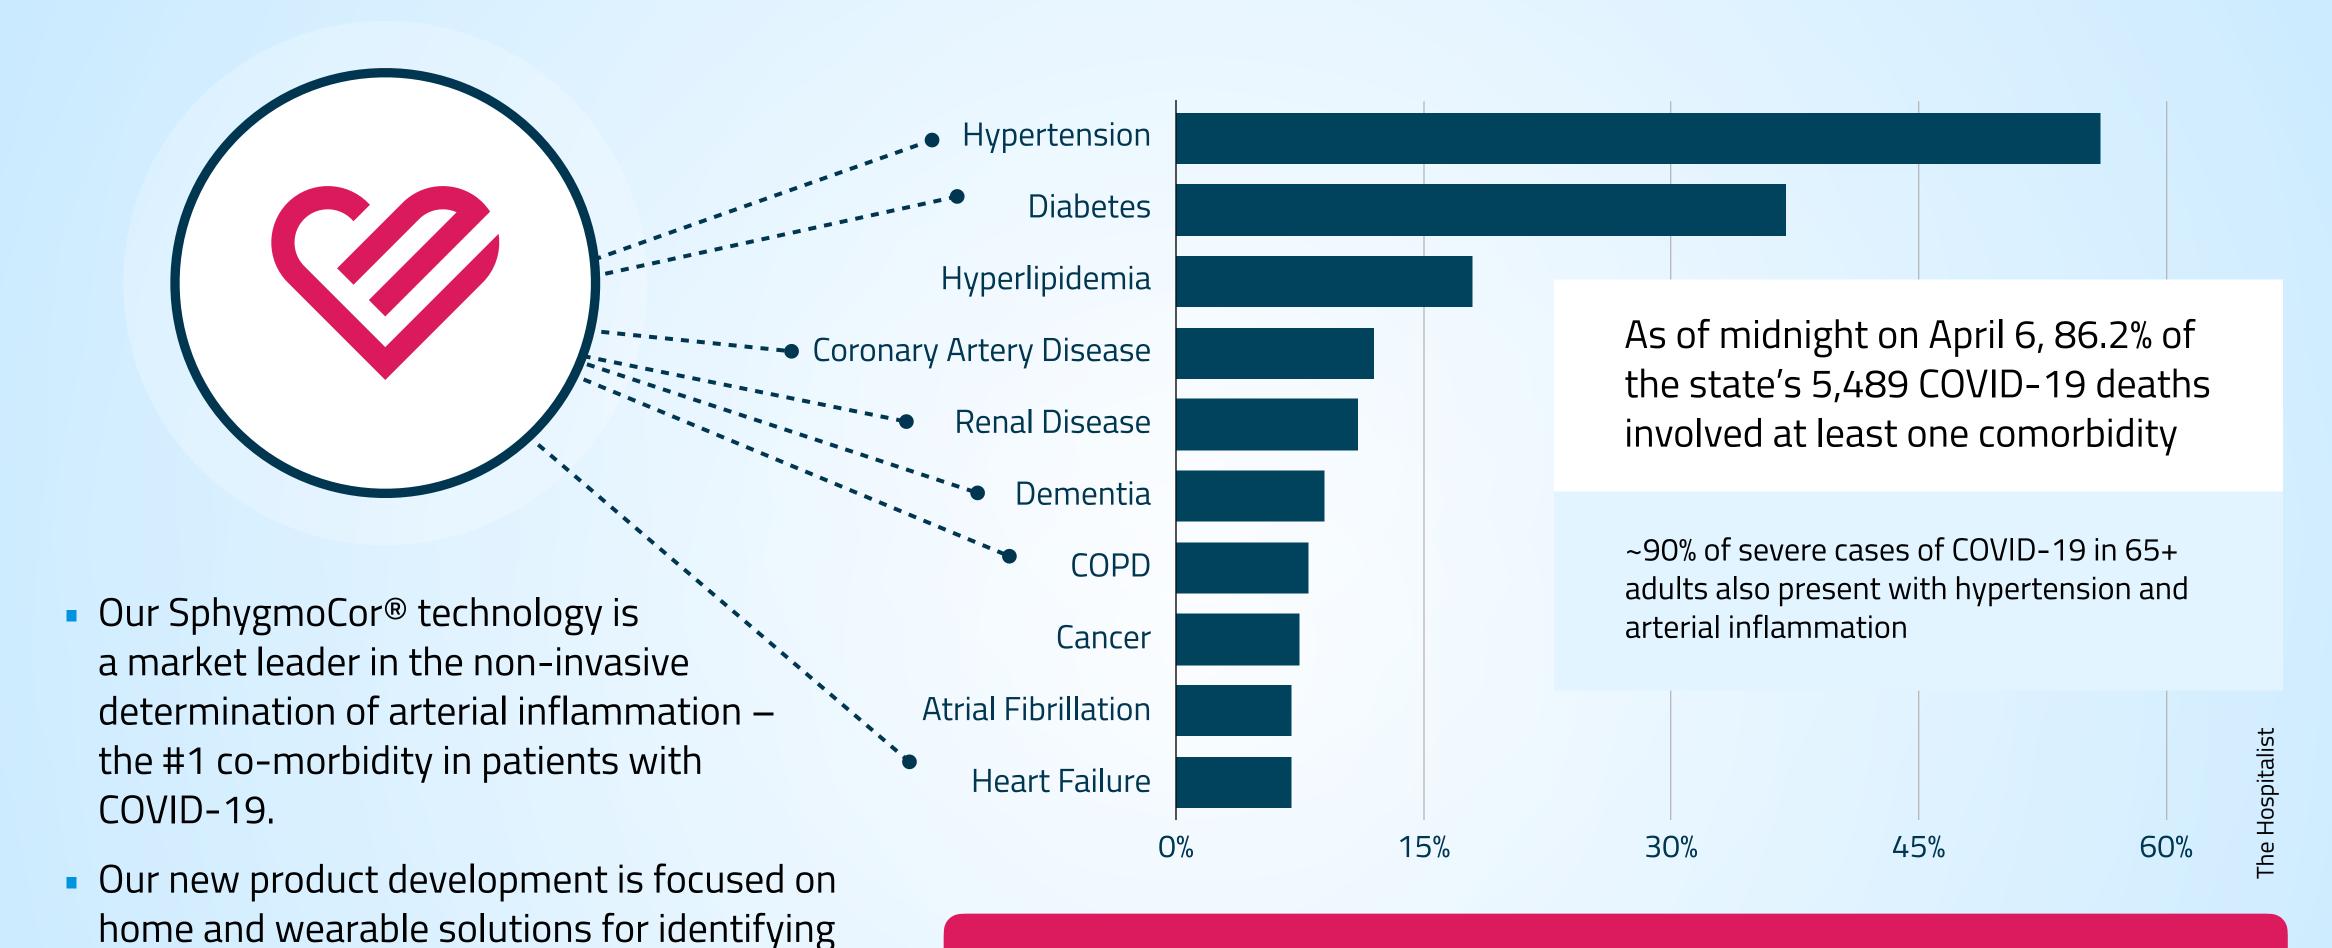

RELEVANCE DURING PANDEMICS

Leading Comorbidities among COVID-19 Deaths in New York 7

*

arterial inflammation and overall risk for other

arterial health disorders.

OUR CURRENT SOLUTIONS

CardieX's ATCOR division develops and licenses products that precisely measure individual risk for hypertension & vascular disease.

- Patented technology measures "<u>central</u> blood pressure" at the aorta/heart rather than "<u>peripheral</u> blood pressure" at the arm as well as arterial stiffness.
- Measuring "central pressure" provides medical and consumer health parameters not otherwise attainable using traditional blood pressure devices.
- Allows more precise and accurate determination of hypertension and risk of vascular related disease such as Alzheimer's, stroke, and other inflammatory disorders.
- Two current products: XCEL and Oscar 2 ABPM
- The only technology FDA approved to measure central pressure non-invasively in adults that qualifies for Medicare reimbursement.
- Currently undertaking significant product and market expansion combined with new sales, pricing, and marketing strategies.

All "**Top 20 Hospitals**" use SphygmoCor technology to measure central blood pressure (cBP)

1,400+ papers have been published in leading peer-reviewed journals like *Hypertension, Journal of Clinical Hypertension,* and the *Journal of the American College of Cardiology*

8 out of Top 10 Pharma companies have used SphygmoCor technology in their clinical trials

Over **11,000 patients** have been tested with SphygmoCor technology in pharmaceutical trials

CENTRAL BLOOD PRESSURE

CardieX's Complete Vital Signs Solution

Central Blood (cBP) + arterial stiffness provides **complete BP measurements**.

Gold-standard non-invasive cBP in addition to standard BP numbers.

Numerous **medical grade measurements** for heart & arterial health.

OUR PARTNERS & CUSTOMERS

We Currently Sell/Lease XCEL SphygmoCor® and Related Products to:

Research and Pharmaceutical companies for clinical trial services related to CVD and hypertension.

Specialist practices-principally Cardiologists, Nephrologists and Endocrinologists for measurement of pulse wave and cBP (central blood pressure).

IDN/health care service providers in the USA for sale to their affiliate hospital and caregiver networks.

Licensing agreement with SunTech Medical for 24-hour Ambulatory Blood Pressure Measurement (ABPM) for Oscar 2 SphygmoCor® device.

HOME/CONSUMER VITAL SIGNS

Reimagining consumer vital signs monitoring.

- Customizable modules and over-the-air feature upgrades.
- Full suite of arterial and consumer health features -"beyond blood pressure".
- Over 15 programmable health data features at launch (Arty™).
- Full clinical remote patient monitoring solution.

SYS 778

DIA

 Connected arterial health monitoring for population health management.

WEARABLE SENSOR & TECHNOLOGY LICENSING

Licensed and Company Owned Wearables Based on our Arty™ Platform.

Breakthrough technology for monitoring heart and arterial health with wearable devices.

No commercially available wearable can produce all our heart & arterial health features.

Built on the foundation of our **patented** SphygmoCor® technology.

Significant applications across medical and consumer patient populations and general health monitoring.

First phase studies successfully completed. Currently being implemented into partner (Mobvoi) & new CardieX devices.

A complete wearable health monitoring solution.

CARDIEX GOALS IN 2020 & 2021

Product Development Timetable

CARDIEX GOALS IN 2020 & 2021

Significant expansion of new product lines.

Launch of 8 new devices and associated software/digital solutions.

Multiple growth and revenue inflection points throughout the year.

Targeting 3 new FDAclearances in 2021 in consumer, medical, and wearables.

World-leading new health data features derived from our SphygmoCor® technology.

Multiple new partnerships and licensing of our cBP and wearable sensor technology.

Launch of Mobvoi smartwatch. Commercialization of Blumio sensor partnership.

First to market with consumer cBP and hospital/clinician cBP vital signs device.

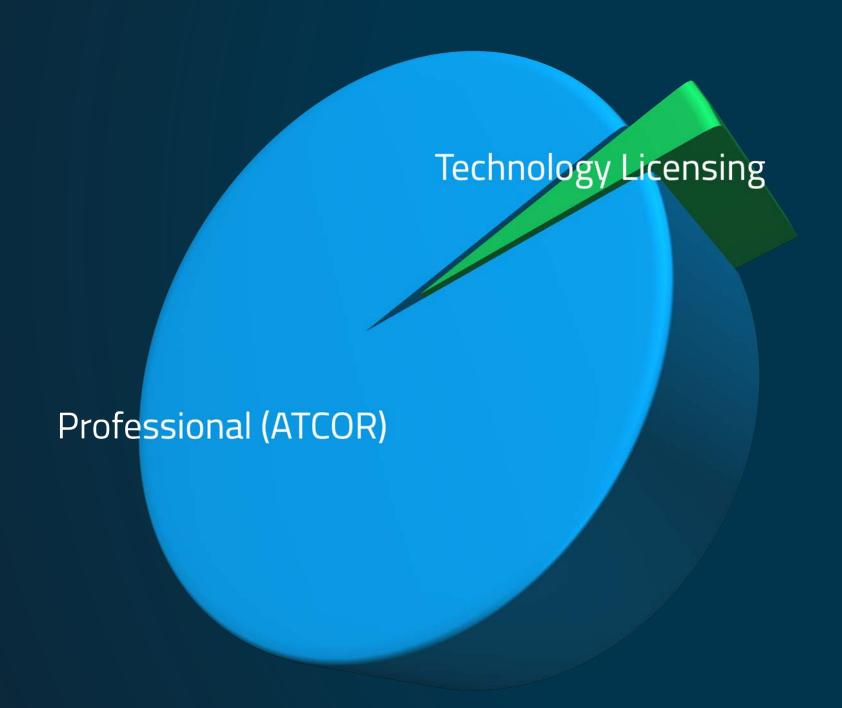

Launch of Arty™ app, cloud, SaaS, and clinician software infrastructure.
