#### **Chairman's Report**

My Fellow Shareholders,

It is a pleasure to present the 2020 Annual Report for CardieX Limited.

This past year has been challenging as we all adapt to a new personal and business environment. Notwithstanding those challenges we finished the year strongly, as shown by our June quarterly cash flow report and the strength shown by our core ATCOR business which continues to perform as we move into 2021.

We have commenced the 2021 year in a position of strength - which has been further bolstered by our recent \$2.5m equity raising. Our focus remains on executing on our product plan with multiple new product releases planned over the course of the next year as we target new medical and consumer technology markets in excess of \$US500b globally. More details are included in the following letter from our CEO, as well as the Operations Update.

Over the last year our executive team and management have continued to deliver on our strategic plan including multiple new partners, customers, and product development initiatives – all of which are driving the future value of our Company. I would like to thank all staff for their continuing efforts in this regard. I would also like to thank my fellow board members Craig Cooper (Director & CEO), King Nelson (independent US based Director), and our newly appointed Director Jarrod White (Director & CFO).

I have great confidence for the years ahead as we continue to drive value for all our shareholders, and I would like to personally thank you for your ongoing support.

Best regards and keep healthy,

Niall Cairns

Executive Chairman CardieX Limited

#### **Chief Executive Officer's Report**

My Fellow Shareholders,

It has been a significant year for us at CardieX as we continued our transition from a pure medical device business to a multi-platform provider of consumer and medical device software/SaaS based solutions – all based on CardieX's unique, market leading, and patented software algorithms and technology.

Importantly, we have made significant progress in regards to new product development and partnerships that form the ecosystem of our focus on remote patient monitoring and telehealth, clinician SaaS solutions, and consumer digital health – all representing multi-billion-dollar market opportunities for your Company.

Our core medical sales business, ATCOR, continues to perform strongly year-on-year with a focus on developing, marketing, and distributing medical technologies that measure patient risk for hypertension, cardiovascular disease and other related vascular disorders.

ATCOR's Clinical Trial Services team also continues to outperform with new contracts with major pharmaceutical companies such as AstraZeneca and Bayer AG – a strong sign that the current COVID-19 environment is not materially impacting the critical-need sector of cardiovascular health trials.

ATCOR.X, a newly created division of ATCOR, is expanding and developing out our core "vital signs" technology into new markets including connected fitness, smart devices, and wearables – sectors that I believe will be a significant opportunity for us over the coming years with the health wearable segment forecast to grow to \$US37b by 2025. The immediate focus of the ATCOR.X being to drive the successful execution of our partnership with Mobvoi, Google's in-country wearable partner in China, and to implement multiple new wearable partnerships for your Company over the course of 2021.

And finally, our partnerships and investments in inHealth (telehealth and lifestyle therapeutics) and Blumio (wearable radar sensors) continue to drive value for us as they each make progress on executing against their respective business plans. Most important in this regard is Blumio's recent announcement of their partnership with semiconductor company Infineon, which can only add to the value of our partnership with that company going forward.

This next year will be the most significant year for the Company since I became your CEO. The last two years have been about repositioning your Company to take advantage of new market opportunities that are unique to our FDA-cleared vital signs technology. Going into this next year I couldn't be more excited and energized about our new product development and the impact we are poised to make on global health solutions.

I would like to thank my fellow Board members and management and staff at CardieX who have worked tirelessly to realise our vision as we continue to grow shareholder value. The last year has been a difficult one for many of us personally but we have been lucky to have a strong, cohesive team that shares our collective vision for the Company as we continue to execute on our business plan.

My best regards,

Craig Cooper

CEO & Managing Director

**CardieX Limited** 

#### **Review of Operations**

The Company operates sales, development, and marketing activities in 6 key market sectors:

- 1. The sale and marketing of XCEL and Oscar 2 medical devices for the management and diagnosis of cardiovascular disease, hypertension, and other vascular disorders (\$US2.5b mkt size: 2025);
- 2. The provision of clinical trial services to research and pharmaceutical companies and institutions;
- 3. Development of consumer & medical wearable technologies (\$US37.6b mkt size: 2025);
- 4. Technology licensing;
- 5. Digital health including telehealth, SaaS, and clinician and consumer digital portals and apps (\$US509b mkt size: 2025); and
- 6. The development of home vital signs monitors incorporating the company's patented & FDA-cleared SphygmoCor® technology.

All our product and development activity is founded in our core arterial waveform technology – known as SphygmoCor®. CardieX is the only company that has FDA clearance for measuring central blood pressure, arterial stiffness, and other proprietary cardiovascular parameters non-invasively in adults. The Company's SphygmoCor® technology currently has more than 4,500 installations globally and is used by leading research and pharmaceutical companies, such as Bayer, AstraZeneca, GSK and others.

The Company provides an update on business operations throughout the year as follows:

#### **Wearable Sensor Technology Development**

CardieX's strategy is to integrate its FDA (US Food and Drug Administration) cleared SphygmoCor® technology into the spectrum of smart wearable devices for consumer and medical settings. This involves a complex and significant technology and engineering effort in order to extract waveforms from a wearable plethysmogram ("PPG") based or otherwise) sensor that correlate well with those extracted by its current FDA-cleared device, which is considered the gold standard for measuring an aortic arterial pressure waveform with cardiovascular features.

In April, 2020, CardieX subsidiary ATCOR completed a major milestone in the development of its wearable sensor technology and derived a series of unique heart and arterial health features from a PPG sensor which have the potential to significantly expand the clinical and consumer applications of the SphygmoCor® technology. As a result, CardieX is now proceeding with the next phase of its JDA with Mobvoi, Google's Wear OS partner in China. The Company has also submitted a new US patent application for its proprietary technology for PPG wearable sensors as well as a number of trademark applications for the medical and clinical data sets that the Company has been able to extract so far.

ATCOR completed internal human studies (13 subjects, 157 signals, with an age range of 20 to 65 years, with results distinguishing between healthy, non-healthy, young and elderly participants) and in conjunction with Macquarie University. ATCOR has initially determined four unique and proprietary heart and arterial health features, which are believed to have been extracted from a PPG sensor for the first time (see below). This represented Phase 1 of the Company's PPG program, and ATCOR's engineering team is now working to complete Phase 2, which includes development of multiple new clinically relevant features for blood pressure management.

#### **Mobvoi Development Partnership**

CardieX also has a Joint Development Agreement (JDA) with Mobvoi for the development of novel and proprietary health technologies, applications and features to be integrated into Mobvoi's next generation smart wearables. Mobvoi is Google's official Wear OS partner in China. As a technology unicorn based in Beijing, Mobvoi boasts a stable of well-known investors, including Google, Volkswagen, ZhenFund and Sequoia Capital China.

The Company's partnership with Mobvoi is focused on the use of PPG sensors to derive unique consumer health functions for integration into Mobvoi smartwatches.

During the last quarter, ATCOR presented the results of its PPG research and engineering efforts to Mobvoi. CardieX is now looking at expanding the opportunities under the JDA to new markets and other applications, such as the provision of data and related technologies to Mobvoi under a "services & subscription model".

#### **OPERATIONAL UPDATE**

#### **New Patent and Trademark Applications**

On 1 June, CardieX submitted a US patent application in support of its wearable strategy. Provisional application 63/031,645 describes a system and method of measuring medically reliable heart & arterial health indicators from a PPG light sensor on a wearable device when a user places their finger on the sensor. The determination of a heart pulse with significant heart and arterial health indicators by way of the patent could previously only be obtained either invasively or through a medical device in a clinical setting.

The biometric data captured by the PPG sensor correlates well with waveforms extracted by the Company's gold standard SphygmoCor® algorithms, and the derived feature set includes:

- Heart Stress;
- Heart Age;
- · Exercise Capacity; and
- · Heart Rate-Plus.

As the most widely used sensors on wearables, PPG sensors are incorporated into a broad range of devices from the world's leading technology companies, including Apple, Samsung, Garmin, Mobvoi, Fitbit and others.

The first application of the patent will likely be on Mobvoi smartwatches, but CardieX also plans to license the technology to other wearable technology companies and include it in the Company's own medical and consumer wearable devices.

In parallel with product development efforts, CardieX has also applied for trademark protection for up to 20 proprietary new parameters and product/service brands in multiple geographies around the globe.

#### **Integrating Central Blood Pressure into New Home BP Monitors**

CardieX is developing a vision for its Complete BP<sup>TM</sup> solution, a powerful combination of brachial and central blood pressure which gives clinicians and consumers alike a more complete picture of blood pressure – all from a home-based device.

In late June 2020, as part of the development of an ATCOR home BP monitor, CardieX programmed and shipped prototype chips to its ODM partner, who will commence integrating the Company's central blood pressure technology into a reference design for a standard brachial BP monitor. Further details of our device and market strategy remain confidential. Our new device development forms a key part of our remote patient monitoring and digital health solutions outlined below.

#### Strategic Partnership with Blumio Continues to Add Value

CardieX has several ongoing partnerships and development efforts, including a Co-Development Agreement (CDA) with Silicon Valley-based Blumio that integrates the Company's proprietary technology into the Blumio radar sensor. The partnership comprises two main parts:

- A Co-Development Agreement (CDA) that provides for the integration of SphygmoCor® technology into the Blumio radar sensor, allowing for a unique and patented set of cardiovascular data features to be extracted by the Blumio sensor; and
- The Company's investment in Blumio for 7.5% equity ownership with the potential to increase to 10% (for no additional cash investment) based on the achievement of certain additional milestones.

CardieX continues to integrate its algorithms and technology into the Blumio sensor under the CDA and has met all important milestones and technology standards to date. For its part, Blumio recently completed its first-generation sensor development kit as one of the major milestones under the CDA. The Blumio Sensor Development Kit consists of a radar sensor board, a wearable enclosure and a small processing unit running algorithms that generate an arterial waveform in real-time. This is the first step towards making Blumio's sensor technology commercially available to device makers as the development kit enables their partners—including CardieX—to execute product development efforts in parallel.

#### **OPERATIONAL UPDATE**

#### Large Global Players Partner with Blumio

Recognizing the importance of the global market opportunity for the Blumio sensor, Swiss healthcare technologies company, Roche, selected Blumio for a pilot project to explore the feasibility of integrating Blumio's sensor technology into Roche's next-generation diagnostics devices. As part of this pilot project, Blumio then introduced global semiconductor manufacturer Infineon Technologies AG into the dialogue with Roche, as Infineon currently manufactures a key component used in diagnostics devices from Roche.

These discussions led to Blumio signing an agreement with Infineon (separate from its pilot agreement with Roche) to co-develop a wearable, non-invasive blood pressure sensor by 2021 based on Infineon's XENSIV™ radar chipset. The new sensor has the potential to disrupt the \$US45 billion market for wearable cardiovascular monitoring devices by enabling continuous and precise BP measurement without a cuff.

Blumio's partnership with Infineon will further promote the accelerated commercialization of Blumio's technology in one of the largest healthcare technology markets. Upon successful completion, a kit combining Infineon's radar chipset and development board with Blumio's software and algorithms will be released to consumer and medical wearable device makers to integrate into their blood pressure monitoring devices.

All boats will rise as a result of this partnership between Infineon and Blumio, and CardieX will be working hard to further refine the integration of its SphygmoCor® technology into the Blumio sensor as development efforts continue. Ultimately from a commercial perspective, the Company's strategy is to continue working with Blumio in parallel to the Infineon/Blumio efforts, so that our algorithms are supported and included in the commercial product of the parties.

The Infineon Development Agreement and the Roche pilot project create the foundation for global development and application of Blumio's sensor technology through the combined networks of both Roche and Infineon.

#### SaaS, Digital Health, and Remote Patient Monitoring Platforms

Our digital platform consists of a full ecosystem of connected devices and digital solutions for remote patient monitoring and consumer health including:

- ArtyNet<sup>™</sup>, a connected HIPPA compliant patient portal for clinicians to remotely manage patient health;
- Arty™, a consumer app that provides unique consumer health data based on our proprietary algorithms;
- Connected devices including wearables and home monitors that remotely connect to both Arty™ and ArtyNet™:
- A telehealth, messaging, and data transfer platform integrated into Arty<sup>™</sup> that provides a full suite of tools for telehealth and remote patient monitoring; and
- A subscription-based SaaS platform.

Together, these digital health assets provide clinicians and consumers with a proprietary suite of health tools unique to our FDA-cleared SphygmoCor® technology. Development work continues on the above with planned launch in 2021 to coincide with our new Complete BP™ device outlined above.

#### ATCOR ABPM Technology Recommended for MSAC Reimbursement

A recommendation in June 2020 from the High Blood Pressure Research Council (HBRCA) that Australia's Medical Services Advisory Committee (MSAC) and the Federal Minister for Health approve reimbursement of ambulatory blood pressure monitoring (ABPM) through the country's Medicare Benefits Schedule (MBS) could increase demand for the Oscar 2 with SphygmoCor Inside ABPM in Australia. The Oscar 2 is a 24-hour ambulatory blood pressure monitor (ABPM) by SunTech Medical that includes the Company's SphygmoCor® technology inside. This product is sold exclusively by ATCOR in Australia.

HBRCA recommends that reimbursement be made available for diagnosis of hypertension in patients who have measured clinic-based blood pressure between 140/90 mmHg and 180/110 mmHg, with reimbursement up to once every 12 months for individuals who have not commenced antihypertensive medication. The average recommended fee is A\$107.60.

HBRCA estimates that more than 700,000 ABPM procedures will be required over the first three years of coverage.

#### **OPERATIONAL UPDATE**

The Oscar 2 device adds ATCOR's proprietary central blood pressure algorithms to a standard ABPM, providing the benefits of central pressure waveform analysis for enhancement and individualization of patient care over standard blood pressure monitoring.

#### **ATCOR Support for Pharmaceutical Clinical Trials Continues Apace**

ATCOR generates significant revenue each year in our clinical trials business unit. We contract with pharmaceutical companies for the use of SphygmoCor® XCEL devices and the provision of core lab and data management services for clinical trials — providing end-to-end service that ultimately delivers clean datasets to study sponsors. SphygmoCor® technology has been utilized in pharma trials across the therapeutic spectrum, participating in clinical trials for hypertension, diabetes, heart failure, psoriasis, renal disease, and many other disease states. We are currently contracted for clinical trials that will enrol over 3,000 patients at more than 150 clinical trial sites in 20 countries across the globe.

#### ATCOR Technology to Feature Prominently in COVID-19 CARTESIAN Study

In a significant validation of our technology, our SphygmoCor® XCEL device was selected by the European ARTERY Society to exclusively measure central blood pressure and augmentation index in the CARTESIAN study — the first clinical trial to focus on the impact of COVID-19 on arterial stiffness and central hemodynamics.

The longitudinal, multicentre study will recruit individuals with recently confirmed infection by SARS-Cov-2, who will undergo two visits – 3 to 6 months and 1 year after COVID-19 diagnosis. During each visit, assessment of carotid-femoral pulse wave velocity and central hemodynamics will be performed.

Ancillary studies will explore additional biomarkers of accelerated vascular aging. The CARTESIAN study aims to identify early predictors of cardiovascular events and inform better preventive care in a post-coronavirus world.

Data from this study will also drive our product development going forward as we seek to refine our medical and consumer devices to better identify COVID-19 risk factors.

#### Restructuring of Agreement with and Investment in inHealth Medical Inc

After the end of Q4, CardieX announced it had restructured its partnership with and investment in inHealth Medical, following significant developments in both businesses since partnership commenced in 2018.

Since then, the inHealth business has developed significantly. The company has signed major global corporations as partners and clients and continued to grow its private practice, partnerships and enterprise business revenues. In addition, inHealth appointed experienced telehealth veteran and technology leader, Harry Kim, as CEO and Chairman, and three new executive hires have significantly enhanced the management team. Interest in US telehealth businesses is strong, and inHealth is well-positioned to raise new capital at significantly favourable valuations from US-based investors and strategic parties, a process the company has already launched.

CardieX and inHealth management teams agreed to restructure the partnership and investment to provide the best capital structure to facilitate new investment, while ensuring that management and founders are appropriately incentivized to drive growth and continued success. Key changes were reducing the outstanding convertible note to USD2.5 million by repayment of USD0.5 million, extending the maturity date to 1 July 2021, and exchanging the option to move to 50.5% for the issuance of 1% of the fully diluted equity of inHealth. This results in CardieX increasing its shareholding to 8.7% and up to 37%, depending on the conversion of the convertible note and before further capital raising.

Furthermore, CardieX and inHealth agreed to an ongoing Collaboration Agreement to develop hypertension and cardiovascular programs for the products, solutions and markets addressed by both parties. These include the current inHealth/CardieX "Central Blood Pressure" research project using SphygmoCor® XCEL device, "Telemedicine to Reduce Cardiovascular Disease Risk: A Randomised Clinical Trial", with Dr. Jeremy McConnell from Florida, USA, as the lead investigator. Under the ongoing Collaboration Agreement, it is expected that a number of other projects may be undertaken on a commercial arms-length basis.

#### **COVID-19 Update on Operations**

The CardieX team is spread throughout its functional HQs in Australia, the United States, and China. CardieX management and staff have all continued to make progress tirelessly during COVID-19 restrictions – working remotely via video-conferencing and other virtual collaboration tools without any loss in productivity. Team members are now carefully migrating back to the office while maintaining appropriate physical distancing and mask-wearing protocols to protect the health and safety of the entire team.

#### **OPERATIONAL UPDATE**

While restrictions slowed down certain operations, such as in-person sales calls, on-site consultations, and live marketing events at industry conferences and trade shows, CardieX accelerated the ongoing ramp-up of its digital marketing strategy. Highlights include:

- eMarketing and hybrid email/phone campaigns to qualify warm leads, update our CRM database, and offer sales promotions to existing customers and new prospects languishing in COVID-19 limbo.
- Addition of high-value content to both the CardieX and ATCOR websites, including recent research on the correlation between chronic hypertension and cognitive impairment as well as articles exploring the cardiovascular complications of COVID-19.
- Launch of a new webinar series in collaboration with leading industry partner, The American Academy of Anti-Aging Medicine (A4M). The first webinar featured noted cardiologist and anti-aging expert, Dr. Mark Houston, discussing "New Approaches to Cardiovascular Aging—Central Pressure Waveforms & Arterial Stiffness Assessment." Registrations and attendance were significant and follow-up interest has been solid to date.
- Launch of a new series of video interviews, entitled "No Pressure". In the first of this series, ATCOR Sales
  Director, Ric Ruffhead, sat down with Dr. Lee Marcus, a preventive cardiologist from New York, to discuss
  the challenges of practicing cardiovascular medicine at the US epicentre of COVID-19, and the likely
  impact on his practice in the future.

#### **Board and Management Appointments**

CardieX announced the appointment of Mr. Jarrod White as a Director of CardieX in May, after the Board identified the practical issues and restrictions imposed on international travel during the COVID-19 pandemic.

Mr. White has been the CFO and Company Secretary of CardieX since early 2018, and he will continue in both roles with Philip Leighfield appointed as Joint Company Secretary. Mr. White's appointment as a director is also recognition of his significant ongoing contribution to the Company.

In addition, CardieX made several significant advances on our digital health solutions strategy. To drive and accelerate that strategy, CardieX made several key hires in Q4:

- Dan Posnack, Director of Product Development Digital Health;
- · Sameer Molvi, Senior Engineering Program Manager;
- Scott Kolek, Senior Software Engineer;
- Ehad Akeila, Senior Firmware Engineer; and
- Rebecca Davis, UI/UX Designer.

#### **Funding Status**

In December 2019 we raised \$1.5 million, (including a commitment from major shareholder C2 Ventures for \$0.5 million, which is subject to shareholder approval) and in March 2020 we executed a \$1.5 million R&D loan facility with Mitchell Asset Management. Early in the new financial year (announced in late July and completed in early August 2020) we raised \$2.5 million - further increasing the Company's cash reserves.

#### **Outlook**

Significant progress was achieved during the last year in relation to technological and commercial development as well as product expansion of the Company's proprietary SphygmoCor® technology. The continued development of wearable sensor technologies in health-related devices provides a large market opportunity for CardieX in clinical and consumer applications, as does our future product portfolio of consumer, home, and clinician-focused medical devices and digital solutions.

The Company is set to release a number of new products over the remainder of calendar 2020 and during 2021 which will significantly expand the commercial opportunity for CardieX. Our strategy also continues to focus on developing the first "uncalibrated", non-invasive and cuffless wearable sensor for monitoring blood pressure and other cardiovascular health vital signs — which is considered to one of the "Holy Grails" in wearable health monitoring. We look forward to updating the market on further progress in this regard as well as in relation to all our product development activities.

#### **DIRECTORS' REPORT**

The Directors of CardieX Limited (the "Company") submit the financial report of the Company for the year ended 30 June 2020, which comprises the results of CardieX Limited and the entities it controlled during the period (the "Group").

#### **Review of Operations**

The loss for the Group after income tax amounted to \$3,320,427 (30 June 2019 \$2,979,278).

The Group has generated total revenue of \$4,616,664, up from \$4,062,091 in the previous year.

#### **Principal Activities**

During the year the principal continuing activities of the Group consisted of designing, manufacturing and marketing medical devices for use in cardiovascular health management.

#### **Dividends**

No dividends were paid or declared by the Group since the end of the previous financial year and the Directors do not recommend dividends be paid for the year ended 30 June 2020.

#### Significant Changes in the State of Affairs

There were no significant changes in the state of affairs of the Group not outlined in the Review of Operations.

#### Likely Developments and Expected Results of Operations

Further information on likely developments in the operations of the Group and the expected results of operations have not been included in this annual financial report because the directors believe it would be likely to result in unreasonable prejudice to the Group.

#### **Matters Subsequent to Year End**

Subsequent to balance date the Group announced the following material events:

- In July 2020, CardieX restructured its investment in inHealth and received US\$0.5m of the US\$3m Convertible Note, reducing the principal investment to US\$2.5m;
- CardieX signed a new Collaboration Agreement with inHealth resulting in a re-setting of the investment relationship between the entities;
- On 27 July 2020, CardieX completed a \$2.5 million placement from new strategic investors as \$0.03 per share with a 1 for 5 free attaching listed option (CDXO), resulting in the issue of 83,333,334 new Shares and 16,666,667 Listed Options.
- On 20 August 2020, AtCor Medical Inc, a CardieX Limited subsidiary, entered into a new contract for the lease of ATCOR devices and the provision of expanded data management services for Bayer's "AVANTI" trial. The extension of the contract is valued at US\$420k.

No other significant subsequent event has arisen that significantly affects the operations of the Group.

#### **DIRECTORS' REPORT (CONT.)**

#### **Directors**

The following persons held office as Directors of CardieX Limited at any time during or since the end of the financial year:

Mr. Niall Cairns Mr. King Nelson Mr. Craig Cooper

Mr. Jarrod White (appointed 21 May 2020)

#### **Joint Company Secretaries**

Mr. Jarrod White Mr. Philip Leighfield

#### **Chief Financial Officer**

Mr. Jarrod White

#### Information on Directors

### Mr. Niall Cairns Executive Chairman and Director

Qualifications: B.Ec, CA and FAICD

Appointed: 20 December 2017, appointed Chairman on 27 February 2019

Experience and expertise: Mr Cairns is a Sydney based technology growth investor with over 25

years of track record of value creation, restructuring, and exits in both listed and unlisted companies having assisted in driving the global growth of over 50 companies in sectors as diverse as digital media, Agtech, Medtech, consumer Internet, and SaaS based businesses. Niall is currently the Chairman of ComOps Limited and a non-executive director of Chant West Holdings and Tru-Test Limited.

Other current directorships: Consolidated Financial Holdings Limited (formerly Chant West

Holdings Limited), Tambla Limited

Former directorships (last 3 years): Tru-Test Corporation Limited, Kestrel Growth Companies Limited,

Com Ops Limited

Special responsibilities:

• Chairman of the Board.

Chairman of the audit and risk committee.

Member of remuneration and nomination committee.

#### **DIRECTORS' REPORT (CONT.)**

Mr. King Nelson Non-executive Director

Qualifications: BA, MBA

Appointed: 13 November 2015

Experience and expertise: King was elected to the Board in November 2015. He brings more

than 30 years of diverse experience and expertise with medical devices. He is a former President and CEO of Uptake Medical Corporation, a company focused on treatments for emphysema and lung cancer. Previously, he served as president and CEO of Kerberos Proximal Solutions, which was acquired by FoxHollow Technologies, and as president and CEO of VenPro, a heart valve business acquired by Medtronic. Both these companies specialized in devices for the cardiovascular system. Prior to that, he spent 19 years with Baxter International and American Hospital Supply Corporation in roles of increasing responsibility that included division president for Dade Diagnostics, Bentley Labs, and Baxter's Perfusion Services. King is also currently CEO of Q'Apel Medical – a Medical

device company focused on Neurovascular disease

Other current directorships: None.

Former directorships (last 3 years): Uptake Medical Corporation

Special responsibilities: • Chair of remuneration and nomination committee.

Member of audit and risk committee.

Mr. Craig Cooper Executive Director, Chief Executive Officer

Qualifications: B.Ec, LLB (Hons)
Appointed: 1 December 2017

Experience and expertise: Mr Cooper was appointed as Chief Executive Officer effective 1

December 2017. Mr Cooper has founded multiple successful health, digital media, technology, and wellness businesses – and was also the co-founder of the telecommunications company Boost Mobile one of the leading mobile phone business in the USA. He is recognised as a global expert and thought leader in mobile and wireless technology as well as digital health and med-tech-related businesses. His venture capital funds have raised over A\$1 billion in capital and have funded some of the most significant global digital media technology companies including Buzzfeed and The Huffington

Post.

Other current directorships:

Former directorships (last 3 years):

Special responsibilities:

None.

#### **DIRECTORS' REPORT (CONT.)**

Mr. Jarrod White **Non-executive Director** 

Qualifications: B.Bus, CA 21 May 2020 Appointed:

Experience and expertise: Mr. White is a Chartered Accountant and founding Director of

Traverse Accountants Pty Ltd, a Corporate Advisory and Chartered Accounting Firm. In conjunction with his Corporate Advisory roles at Traverse Mr. White has been appointed Company Secretary and Chief Financial Officer of several other listed entities that operate on the Australian Stock Exchange and has a sound knowledge of corporate governance and compliance. Jarrod has also been an advisor to a wide range of capital raisings, IPO's and reverse takeover transactions and has a focus on working with growing

Companies in the exploration, technology and biotech space.

Other current directorships:

High Peak Royalties Limited (ASX.HPR) Former directorships (last 3 years):

Special responsibilities: None.

#### **Meetings of Directors**

The number of meetings of the Group's Board of Directors and of each Board Committee held during the financial year ended 30 June 2020 and the number of meetings attended by each Director were:

#### **Directors Meetings**

Director	<b>Held Whilst in Office</b>	Attended
Niall Cairns	5	5
King Nelson	5	4
Craig Cooper	5	5
Jarrod White	1	1

#### **Directors' Interests**

Information on the Directors' and their associates' interests in shares and options of the Company at 30 June 2020 can be found in the Remuneration Report on page 15.

#### Shares Issued on the Exercise of Options

During the financial year ended 30 June 2020, there were no shares issued on the exercise of options.

#### **Environmental Regulations**

The Group's operations are not regulated by any significant environmental regulation under a law of the Commonwealth or of a state or territory.

#### **Indemnity and Insurance of Directors and Officers**

During the financial year the Group paid premiums in respect of a contract insuring Directors and Executives against a liability incurred in the ordinary course of business.

#### **Proceedings on Behalf of the Company**

No person has applied for leave of court to bring proceedings on behalf of the Company or intervene in any proceedings to which the Company is a party for the purpose of taking responsibility on behalf of the Company for all or any part of those proceedings.

The Company was not a party to any such proceedings during the year.

**DIRECTORS' REPORT (CONT.)** 

#### **Corporate Governance Statement**

A copy of the Corporate Governance Statement has not been disclosed within the Annual Report but is available on the website <a href="http://www.CardieX.com">http://www.CardieX.com</a> in accordance with the ASX Listing Rule 4.10.3.

#### **Declaration by Directors**

Before it approved the Company's 2020 financial statements, the Board was satisfied that the financial records have been properly maintained and that the financial statements comply with the appropriate accounting standards and give a true and fair view of the financial position and performance of the Group, and their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.

#### **Non-audit Services**

The Directors received the Auditor's Independence Declaration under s.307 of the *Corporations Act 2001*, which is set out on page 19. The external auditor did not provide non-audit services to the Company during the year ended 30 June 2020.

#### Indemnity and insurance of auditor

The Company has not, during or since the end of the financial year, indemnified or agreed to indemnify the auditor of the Company or any related entity against a liability incurred by the auditor.

During the financial year, the Company has not paid a premium in respect of a contract to insure the auditor of the Company or any related entity.

#### Officers of the Company who are former partners of BDO

There are no officers of the Company who are former partners of BDO.

#### Auditor's independence declaration

A copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 is set out on page 19.

#### **REMUNERATION REPORT**

This report outlines the remuneration arrangements in place for Directors and executives of CardieX Limited. The information in this report has been audited as required by 308(3C) of the Corporations Act 2001.

#### Principles used to determine the nature and amount of remuneration

#### Non-executive directors

Fees and payments to non-executive directors reflect the demands which are made on, and the responsibilities of, the directors. Non-executive directors' fees and payments are reviewed annually by the Board. The Board also refers to external surveys to ensure non-executive directors' fees and payments are appropriate and in line with the market. The Chairman's fees are determined independently to the fees of non-executive directors based on comparative roles in the external market. The Chairman is not present at any discussions relating to determination of his own remuneration. Non-executive directors are entitled to receive share options, following approval by the shareholders of CardieX Limited.

Non-executive directors' fees are determined within an aggregate directors' fee pool limit, which is periodically recommended for approval by shareholders. The pool was increased to \$360,000 at the 2015 shareholder meeting, excluding share-based payments that are subject to separate shareholder approval.

#### **Executives**

The objective of the Group's executive reward framework is to ensure reward for performance is competitive and appropriate for the results delivered. The framework aligns executive reward with achievement of strategic objectives and the creation of value for shareholders.

The Board ensures that executive reward satisfies the following key criteria for good reward governance practices:

- competitiveness and reasonableness;
- acceptability to shareholders;
- performance linkage / alignment of executive compensation;
- transparency; and
- capital management.

#### Alignment to shareholders' interests:

- has Company growth as a core component of plan design:
- focuses on sustained long-term growth in shareholder wealth; and
- attracts and retains high calibre executives.

#### Alignment to program participants' interests:

- rewards capability and experience;
- reflects competitive reward for contribution to growth in Company value;
- provides a clear structure for earning rewards; and
- provides recognition for contribution.

The Chief Executive Officer has been issued with 24 million performance rights in the year that will vest across 3 equal tranches subject to incremental improvements in the Company's share price. All other directors and key management personnel are on fixed remuneration as befitting their non-executive status.

Details of the nature and amount of each element of the emoluments of each Director of CardieX Limited are set out below.

#### **Directors**

Names and positions held of key management personnel in office at any time during the financial year are:

Mr. Niall Cairns Executive Director and Chairman Mr. King Nelson Non-executive Director

Mr. Craig Cooper CEO and Executive Director

Mr. Jarrod White Non-executive Director (appointed 21 May 2020)

Tranche 5	4 million	\$0.12	06/03/2022
Tranche 6	12 million	\$0.15	06/03/2022

#### **Employment Agreements**

Remuneration and other terms of employment for the CEO and the other key management personnel are formalised in employment agreements. Each of these agreements provide for the provision of performance related cash bonuses, other benefits including health insurance and car allowances, and participation, when eligible, in the Cardiex Limited Employee Share Option Plan. Other major provisions of the agreements relating to remuneration are set out below.

All contracts with executives may be terminated early by either party with variable notice periods, subject to termination payments as detailed below.

#### Craig Cooper - Chief Executive Officer

- Agreement commenced on 1 December 2017.
- Base salary of US\$300,000 per annum.
- Reimbursement for reasonable expenses incurred in running the US business, paid on a monthly basis.

#### Niall Cairns - Executive Chairman and Director

- Current agreement commenced with an effective date of 1 August 2019.
- Monthly consulting fee for strategic review and consulting services of US\$10,000 per month.
- Reimbursement for reasonable expenses incurred.

#### Jarrod White - Director

- Jarrod White is the principal of Traverse Accountants Pty Ltd, who holds an engagement with the Group covering CFO services, Company Secretarial services, and other general accountancy services;
- Mr White will receive Directors Fees from 1 July 2020 for \$30,000 per annum in addition to the arms' length services paid to Traverse Accountants Pty Ltd.

#### **Loans to Directors and Key Management Personnel**

There were no loans made to directors or key management personnel of the Company and the Group during the period commencing at the beginning of the financial year and up to the date of this report.

Signed in accordance with a resolution of the Board of Directors, made pursuant to s298(2) of the Corporations Act 2001.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### **NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The financial report includes the consolidated financial statements and notes of CardieX Limited and controlled entities ('Consolidated Group' or 'Group'). The separate financial statements and notes of CardieX Limited as an individual parent entity ('Company') have not been presented within the financial report as permitted by the *Corporations Act 2001*. CardieX Limited is a for-profit entity.

The financial statements were authorised for issue on 31 August 2020 by the directors of the Company.

#### **Basis of Preparation**

The financial report is a general purpose financial report that has been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board ("AASB") and the *Corporations Act 2001*.

Australian Accounting Standards set out accounting policies that the AASB has concluded would result in a financial report containing relevant and reliable information about transactions, events and conditions to which they apply. Compliance with Australian Accounting Standards ensures that the financial statements and notes also comply with International Financial Reporting Standards. Material accounting policies adopted in the preparation of this financial report are reported below. They have been consistently applied unless stated otherwise. All applicable new accounting standards have been adopted for the year ended 30 June 2020 unless otherwise stated and their adoption did not have a significant impact on the financial performance or position of the consolidated entity.

The financial report has been prepared on an accruals basis and is based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities.

#### **Accounting Policies**

#### a. Going Concern

The financial statements have been prepared on the going concern basis, which contemplates continuity of normal business activities and the realisation of assets and the discharge of liabilities in the normal course of business.

At the date of signing, the Directors have assessed that there is a material uncertainty related to going concern that may cast significant doubt over the ability of the Group to continue as a going concern given that the Group incurred a loss after tax of \$3,320,427 (2019: \$2,979,278) and had net cash outflows from operating activities of \$1,698,851 for the year ended 30 June 2020 (2019: \$2,290,773). As a result of these conditions the Group may be unable to realise its assets and discharge its liabilities in the normal course of business.

The Directors believe that there are reasonable grounds that the Group will be able to continue as a going concern, after consideration of the following factors:

- The Group has cash and cash equivalents of \$2,061,642 as at 30 June 2020 (2019: \$4,980,826). As at that date, the Group had net assets of \$5,880,001 (2019: \$6,950,935). The Group has performed a cash flow forecast and determined that it has adequate cash resources in place to fund its operations for the next 12 months, subject to additional capital raisings taking place.
- If required, the Group has the ability to continue to raise additional funds on a timely basis pursuant to the Corporations Act 2001. The Group has raised \$1,000,000 in equity funding and \$1,500,000 in debt funding in the previous 12-month reporting period, as well as a further \$2,500,000 since 30 June 2020. The Directors have no reason to believe that it will not be able to continue to source equity or alternative funding if required; and
- The Group has the ability to scale back a significant portion of its development activities if required.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

#### a. Going Concern (Cont.)

Accordingly, the Directors believe that the Group will be able to continue as a going concern, and that it is appropriate to adopt the going concern basis in the preparation of the financial report.

#### b. Principles of Consolidation

A controlled entity is any entity CardieX Limited has the power to control the financial and operating policies of so as to obtain benefits from its activities.

A list of controlled entities is contained in Note 12 to the financial statements. All controlled entities have a 30 June 2020 financial year-end for this current year.

As at the reporting date, the assets and liabilities of all controlled entities have been incorporated into the consolidated financial statements as well as their results for the year ended.

All inter-company balances and transactions between entities in the Group, including any unrealised profits or losses, have been eliminated on consolidation. Accounting policies of subsidiaries have been changed where necessary to ensure consistencies with those policies applied by the Company.

Where controlled entities have entered or left the Group during the year, their operating results have been included/excluded from the date control was obtained or until the date control ceased.

#### c. Revenue Recognition

To determine whether to recognise revenue and what price, the Group follows a 5-step process:

- 1. Identifying the contract with a customer
- 2. Identifying the performance obligations
- 3. Determining the transaction price
- 4. Allocating the transaction price to the performance obligations
- 5. Recognising revenue when/as performance obligation(s) are satisfied.

Total transaction price for a contract is allocated amongst the various performance obligations based on their relative stand-alone selling prices. The transaction price for a contract excludes any amounts collected on behalf of third parties.

Revenue is recognised either at a point in time or over time, when (or as) the Group satisfies performance obligations by transferring the promised goods or services to its customers.

The Group has identified the following revenue streams:

#### Sale of goods

Sale of goods revenue is recognised at the point of sale, which is where the customer has taken delivery of the goods, the control is transferred to the customer and there is a valid sales contract. Amounts disclosed as revenue are net of sales returns and trade discounts.

#### Lease income

The Group earned lease income from both finance and operating lease of goods, and continues to recognise related income in line with AASB 16 Leases. The Group recognises unearned revenue for lease income received in advance where the benefit from the use of the underlying asset has not been diminished. The unearned revenue is reported in the statement of financial position. Similarly, if the Group provides benefits from the underlying asset before it receives the consideration, the Group recognises either a contract lease asset or a receivable in its statement of financial position, depending on whether something other than the passage of time is required before the consideration is due.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

#### c. Revenue Recognition (Cont.)

For operating leases the lease income and interest in relation to the goods are recognised over time per the terms set in the contract with the customer.

For goods sold on a finance lease, income is recognised at the point of sale, which is where the customer has taken delivery of the goods, the control is transferred to the customer and there is a valid sales contract. Any associated interest income is recognised over the life of the lease in line with the terms set in the contract with the customer.

#### Service income

Service income is recognised over time in line with management's assessment of the performance obligations under each contract.

#### Freight income

Freight income is recognised when the control is transferred to the customer and there is a valid sales contract.

#### Royalty income

Royalty income is recognised when entitled under royalty agreements.

#### Other revenue

Other revenue is recognised when it is received or when the right to receive payment is established.

#### d. Government Grants

Government grants relating to costs are deferred and recognised in profit or loss over the period necessary to match them with the costs that they are intended to compensate.

#### Research and development grant income

Research and development grant income is recognised when the Group is entitled to the research and development grant. The amount is treated as other income in the period in which the research and development costs were incurred.

#### Forgivable loans

Income resulting from the forgiveness of a Government loan is recognised when realised, meaning the final forgiveness amount has been determined and forgiveness has been issued by the Government. Until it is reasonably certain that forgiveness will be issued, the loan amount is recognised as a financial liability under AASB 9.

#### e. Plant and Equipment

Each class of property, plant and equipment is carried at cost or fair value less, where applicable, any accumulated depreciation and impairment losses.

#### Depreciation

The depreciable amount of all fixed assets is depreciated on a straight-line basis over their useful lives to the Group commencing from the time the asset is held ready for use.

The useful lives used for depreciable assets are:

Class of Fixed AssetUseful livesManufacturing plant and equipment3 – 10 yearsFurniture, fixtures and equipment3 – 5 yearsDevices leased to customers3 – 4 yearsLease improvementsLife of lease

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

#### e. Plant and Equipment (cont.)

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains and losses are included in the Statement of Profit or Loss and Other Comprehensive Income.

#### f. Impairment of Assets

At each reporting date, the Group reviews the carrying values of its tangible assets to determine whether there is any indication that those assets have been impaired. If such an indication exists, the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use, is compared to the asset's carrying value. Any excess of the asset's carrying value over its recoverable amount is expensed to the Statement of Profit or Loss and Other Comprehensive Income.

Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

#### g. Financial Instruments

#### Recognition, initial measurement and derecognition

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instrument and are measured initially at fair value adjusted by transactions costs, except for those carried at fair value through profit or loss, which are measured initially at fair value. Subsequent measurement of financial assets and financial liabilities are described below.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and substantially all the risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

#### Classification and subsequent measurement of financial assets

Except for those trade receivables that do not contain a significant financing component and are measured at the transaction price in accordance with AASB 9, all financial assets are initially measured at fair value adjusted for transaction costs (where applicable).

#### **Hybrid contracts**

If a hybrid contract contains a host that is a financial asset, the policies applicable to financial assets are applied consistently to the entire contract.

#### Subsequent measurement of financial assets

For the purpose of subsequent measurement, financial assets, other than those designated and effective as hedging instruments, are classified into the following categories upon initial recognition:

- financial assets at amortised cost
- financial assets at fair value through profit or loss (FVPL)
- debt instruments at fair value through other comprehensive income (FVOCI)
- equity instruments at fair value through other comprehensive income (FVOCI)

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

#### g. Financial Instruments (Cont.)

Classifications are determined by both:

- the entity's business model for managing the financial asset
- the contractual cash flow characteristics of the financial assets

All income and expenses relating to financial assets that are recognised in profit or loss are presented within finance costs, finance income or other financial items, except for impairment of trade receivables which is presented within other expenses.

#### Financial assets at amortised cost

Financial assets are measured at amortised cost if the assets meet the following conditions (and are not designated as FVPL):

- they are held within a business model whose objective is to hold the financial assets and collect its contractual cash flows
- the contractual terms of the financial assets give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding

After initial recognition, these are measured at amortised cost using the effective interest method. Discounting is omitted where the effect of discounting is immaterial. The Company's cash and cash equivalents, trade and most other receivables fall into this category of financial.

#### Financial assets at fair value through profit or loss (FVPL)

Financial assets that are held within a business model other than 'hold to collect' or 'hold to collect and sell' are categorised at fair value through profit and loss. Further, irrespective of business model, financial assets whose contractual cash flows are not solely payments of principal and interest are accounted for at FVPL. All derivative financial instruments fall into this category, except for those designated and effective as hedging instruments, for which the hedge accounting requirements apply.

#### Debt instruments at fair value through other comprehensive income (Debt FVOCI)

Financial assets with contractual cash flows representing solely payments of principal and interest and held within a business model of collecting the contractual cash flows and selling the assets are accounted for at FVOCI. Any gains or losses recognised in OCI will be recycled upon derecognition of the asset.

#### Equity instruments at fair value through other comprehensive income (Equity FVOCI)

Investments in equity instruments that are not held for trading are eligible for an irrevocable election at inception to be measured at FVOCI. Under this category, subsequent movements in fair value are recognised in other comprehensive income and are never reclassified to profit or loss. Dividend income is taken to profit or loss unless the dividend clearly represents return of capital.

#### Impairment of Financial assets

The Group recognises a loss allowance for expected credit losses on financial assets which are either measured at amortised cost or fair value through other comprehensive income. The measurement of the loss allowance depends upon the Group's assessment at the end of each reporting period as to whether the financial instrument's credit risk has increased significantly since initial recognition, based on reasonable and supportable information that is available, without undue cost or effort to obtain.

Where there has not been a significant increase in exposure to credit risk since initial recognition, a 12-month expected credit loss allowance is estimated. This represents a portion of the asset's lifetime expected credit losses that is attributable to a default event that is possible within the next 12 months. Where a financial asset has become credit impaired or where it is determined that credit risk has increased significantly, the loss allowance is based on the asset's lifetime expected credit losses. The amount of expected credit loss recognised is measured on the basis of the probability weighted present value of anticipated cash shortfalls over the life of the instrument discounted at the original effective interest rate.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

#### g. Financial Instruments (Cont.)

For financial assets mandatorily measured at fair value through other comprehensive income, the loss allowance is recognised in other comprehensive income with a corresponding expense through profit or loss. In all other cases, the loss allowance reduces the asset's carrying value with a corresponding expense through profit or loss.

#### Trade and other receivables and contract assets

The Group makes use of a simplified approach in accounting for trade and other receivables as well as contract assets and records the loss allowance at the amount equal to the expected lifetime credit losses. In using this practical expedient, the Group uses its historical experience, external indicators and forward-looking information to calculate the expected credit losses using a provision matrix.

The Group assess impairment of trade receivables on a collective basis as they possess credit risk characteristics based on the days past due.

All financial assets, except for those at fair value through profit or loss (FVPL) and equity investments at fair value through other comprehensive income (equity FVOCI), are subject to review for impairment at least at each reporting date to identify whether there is any objective evidence that a financial asset or a group of financial assets is impaired.

#### Financial assets at fair value through other comprehensive income

The Group recognises 12 months expected credit losses for financial assets at FVOCI. As most of these instruments have a high credit rating, the likelihood of default is deemed small. However, at each reporting date the Company assesses whether there has been a significant increase in the credit risk of the instrument.

In assessing these risks, the Group relies on readily available information such as the credit ratings issued by the major credit rating agencies for the respective asset. The Group only holds simple financial instruments for which specific credit ratings are usually available. In the unlikely event that there is no or only little information on factors influencing the ratings of the asset available, the Group would aggregate similar instruments into a portfolio to assess on this basis whether there has been a significant increase in credit risk.

In addition, the Group considers other indicators such as adverse changes in business, economic or financial conditions that could affect the borrower's ability to meet its debt obligation or unexpected changes in the borrowers operating results.

Should any of these indicators imply a significant increase in the instrument's credit risk, the Group recognises for this instrument or class of instruments the lifetime expected credit losses.

#### Classification and measurement of financial liabilities

As the accounting for financial liabilities remains largely unchanged from AASB 139, the Group's financial liabilities were not impacted by the adoption of AASB 9. However, for completeness, the accounting policy is disclosed below. The Group's financial liabilities include borrowings, trade and other payables and derivative financial instruments.

Financial liabilities are initially measured at fair value, and, where applicable, adjusted for transaction costs unless the Group designated a financial liability at fair value through profit or loss. Subsequently, financial liabilities are measured at amortised cost using the effective interest method except for derivatives and financial liabilities designated at FVPL, which are carried subsequently at fair value with gains or losses recognised in profit or loss (other than derivative financial instruments that are designated and effective as hedging instruments).

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

#### h. Employee Benefits

Provision is made for the Group's liability for employee benefits arising from services rendered by employees to balance date. Employee benefits that are expected to be settled within one year have been measured at the amounts expected to be paid when the liability is settled. Employee benefits payable later than one year have been measured at the present value of the estimated future cash flows to be made for those benefits. Those cash flows are discounted using market yields on national government bonds with terms to maturity that match the expected timing of the cash flows.

#### i. Leases

AASB 16 was issued in February 2016 for adoption from January 2019. The Group has decided to early adopt the standard from 1 July 2018. It has resulted in almost all the Group's leases being recognised on the statement of financial position as right-of-use assets, as the distinction between operating and finance leases is removed. Under the new standard, an asset (the right to use the leased item) and a financial liability to pay rentals are recognised. The only exceptions are short-term and low-value leases.

The Group has applied AASB 16 using the modified retrospective approach and therefore the comparative information has not been restated and continues to be reported under the preceding standard, AASB 117 *Leases*.

Where a lease is identified at inception, the Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the ignition amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is location, less any leased incentives received.

The Group assesses whether a contract is or contains a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined at leases with a lease term of 12 months or less) and leases of low value assets. For these leases, the Group recognises the lease payments as an operating expense son a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The Group used the following practical expedients when applying AASB 16 to leases previously classified as operating leases under AASB117.

- Applied the exemption not to recognise right-of-use assets and liabilities for leases with less than
   12 months of lease term.
- Excluded initial direct costs from measuring the right-of-use asset at the date of initial acquisition.
- Used hindsight when determining the lease term if the contract contains options to extend or terminate the lease.

#### j. Contract liabilities

Contract liabilities represent the Group's obligation to transfer goods or services to a customer and are recognised when a customer pays consideration, or when the Group recognises a receivable to reflect its unconditional right to consideration (whichever is earlier) before the Group has transferred the goods or services to the customer.

#### k. Borrowings

Loans and borrowings are initially recognised at the fair value of the consideration received, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

#### I. Equity-Settled Compensation

There has been no equity based compensation with the exception of that described in Note 25. The capital subscribed to as per this note was acquired at fair value at the time of purchase.

Options issues have their fair value determined with reference to an approved valuation methodology, such as the Black-Scholes valuation method. On issue, the fair value of an option is taken to the Income Statement as equity settled compensation, with a corresponding credit to the options reserve. This is then disclosed as other comprehensive income in the Statement of Comprehensive Income to show other net profit position of the Group from a third party perspective.

Shares have their value determined using the direct method of share price at date of issue multiplied by the number of shares issued.

#### m. Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less.

#### n. Trade and Other Receivables

Trade receivables are recognised when the control of ownership of the underlying sales transactions have passed to the customer in the ordinary course of business. Trade receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognised at fair value. The group holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost using the effective interest method.

The Group has adopted AASB 9 from 1 July 2018. The Group's trade and other receivables at year end and now assessed under the new impairment requirements which use an 'expected credit loss' ('ECL') model to recognise an allowance. Impairment is measured using a 12 month ECL method unless the credit risk on a financial asset has increased significantly since initial recognition in which case the lifetime ECL method is adopted.

#### o. Inventories

Inventories are stated at the lower of cost and net realisable value. Cost includes all expenses directly attributable to the manufacturing process as well as suitable portions of related production overheads, based on normal operating capacity. Costs are assigned using the first in, first out cost formula. Net realisable value is the estimated selling price in the ordinary course of business less any applicable selling expenses.

#### p. Trade and Other Payables

Liabilities for creditors and other amounts are carried at amortised cost, which is the present value of the consideration to be paid in the future for goods and services received, whether or not billed to the Group. The carrying period is dictated by market conditions but is generally less than 30 days.

#### q. Provisions

The Group's provisions consist of short-term and long-term employee benefits.

#### Short-term employee benefits

Short-term employee benefits are benefits, other than termination benefits, that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. Examples of such benefits include wages and salaries, non-monetary benefits and accumulating sick leave. Short-term employee benefits are measured at the undiscounted amounts expected to be paid when the liabilities are settled.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

#### q. Provisions (Cont.)

#### Other long-term employee benefits

The Group's liabilities for annual leave and long service leave are included in other long term benefits as they are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. They are measured at the present value of the expected future payments to be made to employees. The expected future payments incorporate anticipated future wage and salary levels, experience of employee departures and periods of service, and are discounted at rates determined by reference to market yields at the end of the reporting period on high quality corporate bonds that have maturity dates that approximate the timing of the estimated future cash outflows. Any remeasurements arising from experience adjustments and changes in assumptions are recognised in profit or loss in the periods in which the changes occur. The Group presents employee benefit obligations as current liabilities in the statement of financial position if the Group does not have an unconditional right to defer settlement for at least 12 months after the reporting period, irrespective of when the actual settlement is expected to take place.

#### r. Income Tax

The income tax expense or benefit for the period is the tax payable on that period's taxable income based on the applicable income tax rate for each jurisdiction, adjusted by the changes in deferred tax assets and liabilities attributable to temporary differences, unused tax losses and the adjustment recognised for prior periods, where applicable.

CardieX Limited and its wholly owned Australian controlled entities have implemented the tax consolidation legislation as of July 1, 2005.

The head entity, CardieX Limited, and the controlled entities in the tax consolidated group account for their own current and deferred tax amounts. These amounts are measured as if each entity in the tax consolidated group continues to be a standalone taxpayer in its own right.

#### s. Finance Costs

Finance costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial period of time to prepare for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

All other finance costs are recognised in the period in which they are incurred.

#### t. Right of Use Asset

The right-of-use asset is initially measured at cost, which comprised the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying or the site on which it is located, less any lease incentives received.

The Group assesses whether a contract is or contains a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. For these leases, the Group recognises the lease payments as an operating expenses on a straight line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

#### u. Lease Liabilities

The lease liability is initially measured at the present value of fixed lease payments that are not yet paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate.

Variable lease payments are only included in measuring the lease liability if they depend on a rate. In such cases, the initial measurement of the lease liability assumed the variable element will remain unchanged throughout the lease term.

Subsequently, the lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in further lease payments arising from a change in the market rate.

Refer to Note 21 for further details.

#### v. Goods and Services Tax (GST)

Revenue, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Tax Office. In these circumstances the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expense. Receivables and payables in the Statement of Financial Position are shown inclusive of GST.

Cash flows are presented in the Statement of Cash Flows on a gross basis, except for the GST components of investing and financing activities, which are disclosed as operating cash flows. There is provision made in the Statement of Cash Flows to disclose the applicable GST refunds/payments that have been remitted to the ATO to accurately show the cash position of CardieX Limited.

#### w. Foreign Currency Translation

Functional currency

Items included in the financial statements of the Group's operations are measured using the currency of the primary economic environment in which it operates ('the functional currency').

The functional currency of the Company and controlled entities registered in Australia is Australian dollars (AU\$).

The functional currency of the AtCor Medical Inc is United States dollars (US\$).

Foreign currency transactions are translated into the functional currency using the exchange rates ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the end of the reporting period. Foreign exchange gains and losses resulting from settling foreign currency transactions, as well as from restating foreign currency denominated monetary assets and liabilities, are recognised in profit or loss, except when they are deferred in other comprehensive income as qualifying cash flow hedges or where they relate to differences on foreign currency borrowings that provide a hedge against a net investment in a foreign entity.

Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when fair value was determined.

#### Presentation currency

The financial statements are presented in Australian dollars, which is the Group's presentation currency.

Functional currency balances are translated into the presentation currency using the exchange rates at the balance sheet date. Value differences arising from movements in the exchange rate is recognised in the statement of comprehensive income.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

#### x. Issued Capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

#### y. Foreign Currency Translation Reserve

Foreign currency translation reserve comprises foreign currency translation differences arising on the translation of financial statements of the Group's foreign entities into \$AUD.

#### z. Earnings Per Share

Basic earnings per share is calculated by dividing the profit or loss attributable to the owners of the Group excluding any costs of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year.

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financial costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to the dilutive potential ordinary shares.

#### aa. Comparative Figures

Comparative figures have been derived from the financial statements for CardieX Limited for the year ended 30 June 2019, and changes in presentation are made where necessary to comply with accounting standards.

#### ab. Critical Accounting Judgements. Estimates and Assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year are discussed below.

#### Coronavirus (COVID-19) pandemic

Judgement has been exercised in considering the impacts that the Coronavirus (COVID-19) pandemic has had, or may have, on the Group based on known information. This consideration extends to the nature of the products and services offered, customers, supply chain, staffing and geographic regions in which the Group operates. Other than as addressed in specific notes, there does not currently appear to be either any significant impact upon the financial statements or any significant uncertainties with respect to events or conditions which may impact the Group unfavourably as at the reporting date or subsequently as a result of the Coronavirus (COVID-19) pandemic.

#### **Share-based payment transactions**

The Group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using either the Binomial or Black-Scholes model taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

# ab. Critical Accounting Judgements. Estimates and Assumptions Revenue from contracts with customers involving sale of goods

When recognising revenue in relation to the sale of goods to customers, the key performance obligation of the Groupis considered to be the point of delivery of the goods to the customer, as this is deemed to be the time that the customer obtains control of the promised goods and therefore the benefits of unimpeded access.

#### Allowance for expected credit losses

The allowance for expected credit losses assessment requires a degree of estimation and judgement. It is based on the lifetime expected credit loss, grouped based on days overdue, and makes assumptions to allocate an overall expected credit loss rate for each group. These assumptions include recent sales experience, historical collection rates, the impact of the Coronavirus (COVID-19) pandemic and forward-looking information that is available.

#### **Provision for impairment of inventories**

The provision for impairment of inventories assessment requires a degree of estimation and judgement. The level of the provision is assessed by taking into account the recent sales experience, the ageing of inventories and other factors that affect inventory obsolescence.

#### Estimation of useful lives of assets

The Group determines the estimated useful lives and related depreciation and amortisation charges for its property, plant and equipment and finite life intangible assets. The useful lives could change significantly as a result of technical innovations or some other event. The depreciation and amortisation charge will increase where the useful lives are less than previously estimated lives, or technically obsolete or non-strategic assets that have been abandoned or sold will be written off or written down.

#### **Employee benefits provision**

As discussed in note 1, the liability for employee benefits expected to be settled more than 12 months from the reporting date are recognised and measured at the present value of the estimated future cash flows to be made in respect of all employees at the reporting date. In determining the present value of the liability, estimates of attrition rates and pay increases through promotion and inflation have been taken into account.

#### Recovery of deferred tax assets

Deferred tax assets are recognised for deductible temporary differences where management considers that it is probable that future taxable profits will be available to utilise those temporary differences. Significant judgement is required on the part of management and the Board to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits over the future years together with future tax planning strategies. Management and the Board have determined not to raise any deferred tax assets which are estimated at \$11,158,840 during the full year ended 30 June 2020 so as to enable the Board to determine more reliably the probability of utilising these tax assets in the foreseeable future.

#### Lease term

The lease term is a significant component in the measurement of both the right-of-use asset and lease liability. Judgement is exercised in determining whether there is reasonable certainty that an option to extend the lease or purchase the underlying asset will be exercised, or an option to terminate the lease will not be exercised, when ascertaining the periods to be included in the lease term. In determining the lease term, all facts and circumstances that create an economical incentive to exercise an extension option, or not to exercise a termination option, are considered at the lease commencement date. Factors considered may include the importance of the asset to the Group's operations; comparison of terms and conditions to prevailing market rates; incurrence of significant penalties; existence of significant leasehold improvements; and the costs and disruption to replace the asset. The Group reassesses whether it is reasonably certain to exercise an extension option, or not exercise a termination option, if there is a significant event or significant change in circumstances.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

# ab. Critical Accounting Judgements. Estimates and Assumptions (Cont.) Incremental borrowing rate

Where the interest rate implicit in a lease cannot be readily determined, an incremental borrowing rate is estimated to discount future lease payments to measure the present value of the lease liability at the lease commencement date. Such a rate is based on what the Group estimates it would have to pay a third party to borrow the funds necessary to obtain an asset of a similar value to the right-of-use asset, with similar terms, security and economic environment.

#### Impairment - general

The Group assesses impairment at the end of each reporting period by evaluating conditions and events specific to the Group that may be indicative of impairment triggers. Recoverable amounts of relevant assets are reassessed using value-in-use calculations which incorporate various key assumptions.

#### Platform and product development costs

Platform and development costs have been expensed in the year in which incurred. These amounts have not been capitalised on the basis that the directors consider that the expenditures do not meet the recognition criteria of development costs as defined by AASB 138 Intangible Assets.

#### **Functional Currency**

The Group has operations in both the US and Australia, however the functional currency is deemed to be Australian dollars as the Group is listed on the Australian stock exchange and the main operations are located in Australia.

#### Functional currency of AtCor Medical Inc.

In determining that United States dollar (US\$) is the functional currency of AtCor Medical Inc., management have applied judgement to assess the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions in AMI. Management have considered the currency that mainly influences sales prices for goods and services and labour, material and other costs of providing goods or services.

#### Fair value measurement hierarchy

The consolidated entity is required to classify all assets and liabilities, measured at fair value, using a three level hierarchy, based on the lowest level of input that is significant to the entire fair value measurement, being: Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date; Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and Level 3: Unobservable inputs for the asset or liability. Considerable judgement is required to determine what is significant to fair value and therefore which category the asset or liability is placed in can be subjective.

The fair value of assets and liabilities classified as level 3 is determined by the use of valuation models. These include discounted cash flow analysis or the use of observable inputs that require significant adjustments based on unobservable inputs.

#### ac. New Accounting Standards and Interpretations Adopted

#### IFRIC 23: Uncertainty Over Income Tax Treatments

The Group has adopted IFRIC 23 from 1 July 2019, which requires entities to consider if it is probable that the tax authority will accept an uncertain tax treatment.

At 30 June 2020, the Group has not identified any uncertain tax treatments and as a result, the adoption of IFRIC 23 did not have a significant impact on the financial performance or position of the Group as at 30 June 2020 or on opening accumulated losses at 1 July 2019.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

### NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT.)

#### ab. Critical Accounting Judgements. Estimates and Assumptions (Cont.)

The Group has adopted all other new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

### ad. New and Revised Accounting Standards not yet mandatory or early adopted

As at 30 June 2020, the group has adopted all new and revised mandatory accounting standards applicable. Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

Total revenue	4,616,664	4,062,091

CardieX leases multiple medical devices to customers as part of pharmaceutical trials. The amounts are paid over an accelerated term per the signed contract, and then revenue is recognised on a straight line basis based on the amount of equipment delivered. The equipment is leased to the customer for approximately 2 years which is not considered to be a major part of the economic life of the asset. The equipment is returned to CardieX at the end of the lease and the equipment can continue to be used without any major modification.

Differences in overseas tax rates	135,860	119,182
Benefit of tax losses and temporary differences not recognised	603,233	688,464
Income tax expense	-	_

The Group has carried forward tax losses, calculated according to Australian income tax legislation of \$40,577,600 (2019: \$38,018,179), which will be deductible from future assessable income provided that income is derived, and:

- a) The Company and its controlled entities carry on a business of, or a business that includes software development in Australia; and
- b) No change in tax legislation adversely affects the Group and its controlled entities in realising the benefit from the deduction for the losses.

The benefit of these losses will only be recognised where it is probable that future taxable profit will be available against which the benefits of the deferred tax asset can be utilised. Deferred tax assets are estimated but not recognised at \$11,158,840 at 30 June 2020 (2019: \$10,454,999).

CardieX Limited and its wholly-owned Australian controlled entities are consolidated for income tax purposes. The accounting policy in relation to this legislation is set out in note 1(r).

As at the date of this report the entities in the tax consolidation group had not entered into a tax sharing agreement. No compensation has been received or paid for any current tax payable or deferred tax assets relating to tax losses assumed by the parent entity since implementation of the tax consolidation regime.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

### NOTE 9: TRADE AND OTHER RECEIVABLES (CONT.)

#### a) Impaired trade receivables

Trade receivables and other receivables are non-interest bearing and are generally on 30 to 60 day terms.

The Group has adopted AASB 9 from 1 July 2018. The Group's trade and other receivables at year end are now assessed under the new impairment requirements which use an 'expected credit loss' ('ECL') model to recognise an allowance. Impairment is measured using a 12-month ECL method unless the credit risk on a financial asset has increased significantly since initial recognition in which case the lifetime ECL method is adopted.

As at 30 June 2020 current trade receivables of the Group with a nominal value of \$68,164 (2019: \$138,485) were fully impaired.

At 1 July	138,485	108,859
Provision for impairment recognised during the year	67,815	32,705
Reversed of provision upon receipt of payment	(31,570)	-
Receivables written off during the year as uncollectible	(106,566)	(3,079)
At 30 June	68,164	138,485

#### (b) Fair value, foreign exchange and credit risk

Due to the short-term nature of these receivables, their carrying amount is assumed to approximate their fair value. The maximum exposure to credit risk at the reporting date is the carrying amount of each class of receivables mentioned above. Refer to Note 29 for more information on the risk management policy of the Group, the credit quality and foreign currency risk of the Group's trade receivables.

#### (c) Interest rate risk

Detail regarding interest rate risk exposure is disclosed in Note 29.

#### **NOTE 10: INVENTORY**

Raw materials and stores - at cost	267,558	223,078
Finished goods at cost	68,087	71,818
Provision for inventory impairment	(75,966)	(75,966)
	259,679	218,930

There were no charges to write-off obsolete inventories in the year ended 30 June 2020 (2019: \$55,792).

### Blumio Inc

- In March 2018, the Company entered into a convertible note purchase agreement for the acquisition of a Convertible Note (the "Blumio Note") issued by Blumio Inc, payable in two instalments. The full principal balance of US\$600,000 payable under the Blumio Note agreement was met on 14 March 2019;
- Both the debt and derivative components of the Blumio Note are measured as a single instrument at fair
  value through profit and loss (FVTPL). It is measured at FVTPL as there is an embedded conversion
  feature. The term of the Blumio Convertible Note continues until a fundraising event of more than
  \$8,000,000 occurs at which point the investment will convert into shares in the Blumio at a 20% discount
  to the price of the fundraising;
- As at 30 June 2020, the total convertible note asset was \$942,373 made up of \$874,253 of payments and \$68,120 in interest.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### **NOTE 17: FINANCIAL ASSETS (CONT.)**

#### inHealth Medical Services

- On 31 January 2019, the Company exercised in full its option under the agreement to purchase US\$3,000,000 of inHealth Medical Services "Tranche 2" (T2) Convertible Note (the "inHealth Note") securities;
- Both the debt and derivative components of the inHealth Note are measured as a single instrument at FVTPL:
- By 31 December 2019, the Company had paid the full US\$3,000,000 to inHealth under the Agreement for the T2 Notes:
- By 30 June 2020, the Company and inHealth had signed an agreement to restructure the partnership. Key changes were reducing the outstanding convertible note to US\$2,500,000 by repayment of US\$500,000, extending the maturity date to 1 July 2021, and exchanging the option to move to 50.5% for the issuance of 1% of the fully diluted equity of inHealth (Note 31);
- There is an intention for an additional US\$1,000,000 to be repaid by 30 June 2021:
- As at 30 June 2020, the total convertible note asset was \$4,742,045 made up of the initial \$4,371,266 payment and \$370,779 in interest. As at 30 June 2020, the Company holds 7.7% equity in inHealth Medical Services, Inc.

#### **NOTE 18: FAIR VALUE MEASUREMENT**

#### Fair value measurement hierarchy

The following tables detail the Group's assets and liabilities, measured or disclosed at fair using a three level hierarchy, based on the lowest level of input that is significant to the entire fair value measurement, being:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3: Unobservable inputs for the asset or liability. Considerable judgement is required to determine
  what is significant to fair value and therefore which category the asset or liability is placed in can be
  subjective.

	Level 1	Level 2	Level 3	Total

Liabilities				
Convertible notes	-	-	778,202	778,202
Total Liabilities	-	-	778,202	778,202

There were no transfers between levels during the financial year.

The carrying amounts of trade and other receivables are assumed to approximate their fair value due to their short-term nature.

The fair value of financial liabilities is estimated by discounting the remaining contractual maturities are the current market interest rate that is available for similar financial liabilities.

The following valuation techniques are used for instruments categorised in Level 3:

Convertible notes (Level 3) – The Group's holding of convertible notes issued by Blumio and inHealth are classified as loans held at FVTPL. The Group periodically reviews the fair value of the convertible notes by reviewing the credit risk posed by the borrowers and the operations of the underlying business.

Shares in inHealth (Level 3) – The fair value of this investment was determined based on an appropriate equity pricing model that takes into account the investee's expected future performance and based on an appropriate growth factor for a similar listed entity and a risk adjusted discount rate.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 19: IMPAIRMENT TESTING OF NON-FINANCIAL ASSETS

The recoverable amount of the consolidated entity's non-financial assets has been determined by a value-in-use calculation using a discounted cash flow model, based on a 2 year projection period approved by management and extrapolated for a further 3 years using a steady rate, together with a terminal value.

Key assumptions are those to which the recoverable amount of an asset or cash-generating unit is most sensitive.

The following key assumptions were used in the discounted cash flow model:

- 14.6% pre-tax discount rate:
- 10% per annum projected revenue growth rate;
- 3% per annum increase in operating costs and overheads.

The discount rate of 14.6% pre-tax reflects management's estimate of the time value of money and the consolidated entity's weighted average cost of capital adjusted for the computer retailing division, the risk free rate and the volatility of the share price relative to market movements.

Management believes the projected 10% revenue growth rate is prudent and justified, based on the revenue growth in the prior year and outlook for the following 12 months.

Management have reduced their estimation of the increase in operating costs and overheads, due to the lower inflation rate and also an effort by the consolidated entity to contain costs.

There were no other key assumptions for the ATCOR division.

Based on the above, it was assessed that the recoverable amount for the ATCOR division exceeded the carrying amount of the Group's non-financial assets, therefore there was no requirement to record any impairment.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

**CURRENT** 

	2020	2019
	\$	\$
Balance due on convertible note purchased	-	3,350,920
Convertible note liabilities	249,447	-

On 31 January 2019, the Company exercised in full its option under the inHealth Convertible Note Purchase Term Sheet Agreement to purchase US\$3,000,000 of InHealth's "Tranche 2" Convertible Note securities ("T2 Notes"). At 1 July 2019, US\$2,350,000 remained unpaid on the purchase price. The full balance was settled in August 2019.

	2020	2019
	\$	\$
NON-CURRENT		
Convertible note liabilities		778,202
Total Non-Current Financial liabilities	<u> </u>	778,202
Total financial liabilities	249,447	4,129,122

In January 2019, C2 Ventures Pty Ltd applied to the Company for 2,500,000 convertible notes at \$1 per note.

On 6 March 2019, 1,638,503 notes were converted to shares and a further 640,303 notes were converted to shares on 21 November 2019. The current liability at 30 June 2020 relates to the remaining 221,194 notes to be converted in FY2021 at \$1 per note, plus \$28,253 in interest.

The convertible notes issued by the Group have been split into the debt liability and a derivative component. The debt liability has been valued at amortised cost and the derivative component of convertible notes issued has been calculated as the residual value of the notes once the fair value of the debt has been deducted from the face value of the notes.

Key terms of the convertible notes per the Convertible Note Deed (the "Deed") are as follows:

Term: 36 months

Drawdown date: 23 January 2019 Funds received: AU\$2,500,000

Interest payable: 6% per annum, accrued daily, capitalised quarterly

Conversion: Convertible to fully paid ordinary shares at a \$0.03 per convertible note

At 30 June 2020, the convertible note was split as follows:

 Host debt liability
 249,447

 Derivative reserve
 35,718

 285,165

#### Paycheck Protection Program

In April 2020, the Group received a non-dilutive loan under the US Government's Paycheck Protection Program (PPP). The PPP is a disaster relief program in the US providing loans to small businesses for the purposes of paying for payroll, rent and utilities. These small business loans have a loan forgiveness feature that may enable the foregoing of repayment on a portion of the loan amount. The terms of this loan are:

- 1% annual interest rate:
- The loan may be forgivable if more than 60% of the funds are used to cover payroll costs over a period of 24 weeks, with the balance required to be used for rent and utilities. The forgivability of the loan will be proportionate to the level of staff retained by the employer;
- Any outstanding amounts are repayable by April 2022.

The Group intends to apply for forgiveness in the first half of FY21.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

### **NOTE 22: BORROWINGS (CONT.)**

#### Term Loan Facility

On 20 March 2020, the Group secured a term loan facility of \$1,500,000 with Mitchell Asset Management Pty Ltd as a prepayment of the forecast research and development (R&D) tax incentive claim for the years ended 30 June 2020 and 30 June 2021. The terms of this loan are:

- 1.25% fixed monthly interest rate;
- FY2020 R&D tax incentive claim to be completed by 31 October 2020 and used to repay the loan;
- Any outstanding amounts are repayable by October 2021.

#### Fair value of options granted

The weighted average assessed fair value at grant date of options granted during the year ended 2020 was 0.7¢ cents per option (2019: 2.97¢). The fair value at grant date is determined using a Black-Scholes option pricing model that takes into account the exercise price, the term of the option, the impact of dilution, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option.

### Free attaching options

These options were provided to investors who participated in the Dec 2019 capital raising, where they were provided 1 option for every 4 shares with an exercise price of \$0.05. The options have no value as they were not provided for any consideration or services in return.

The model inputs for options granted and accrued during the year ended 30 June 2020 included:

		Options	Options	Options	Options	Options
		Granted	Accrued at	Granted	Granted	Granted
		30 Nov 2017	30 Jun 2018	15 Jan 2019	26 Feb 2019	1 Mar 2020
(a)	Number issued	2,500,000	10,000,000	15,300,000	3,000,000	1,000,000
(b)	Exercise price	\$0.038	\$0.050	0.050	0.050	0.050
(c)	Term	4 years	3.5 years	5 years	5 years	4 years
(d)	Share price at grant date	\$0.028	\$0.020	\$0.041	\$0.060	\$0.020
(e)	Share price volatility	60%	74%	89%	88%	65%
(f)	Expected dividend yield	-	-	-	-	-
(g)	Risk-free interest rate	2.16%	2.30%	1.91%	1.74%	0.44%

The expected price volatility is based on the historic volatility (based on the remaining life of the options), adjusted for any expected changes to future volatility due to publicly available information.

#### **Capital Management**

Management controls the capital of the Group in order to maintain a good debt to equity ratio, provide the shareholders with adequate returns and ensure that the group can fund its operations and continue as a going concern.

The Group's capital includes ordinary share capital, shares and financial liabilities, supported by financial assets. There are no externally imposed capital requirements.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

### **NOTE 23: ISSUED CAPITAL (CONT.)**

Management effectively manages the Group's capital by assessing the Group's financial risks and adjusting its capital structure in response to changes in these risks and in the market. These responses include the management of debt levels, distribution to shareholders and share issues.

#### **NOTE 24: RESERVES**

	2020	2019	
	\$	\$	
Share-based payments reserve	1,364,336	1,017,565	
Derivative reserve	35,719	124,160	
Foreign currency translation reserve	569,493	471,607	
	1,969,548	1,613,332	

#### Share-based payments reserve

The based-payments reserve records the fair value of options and performance rights on issue.

#### Derivative reserve

The derivative reserve records the issue date value of the derivative financial instruments recognised in equity. In FY20, the increase in the derivative reserve resulted from the issue of convertible notes. The value of the derivative component of convertible notes issued has been calculated as the residual value of the notes once the fair value of the debt has been deducted from the face value of the notes.

#### Foreign currency reserve

The reserve is used to recognise exchange differences arising from the translation of the financial statements of foreign operations to Australian dollars. It is also used to recognise gains and losses on hedges of the net investments in foreign operations.

	Share-based payments reserve	Foreign currency translation reserve	Derivative reserve	Total

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### **NOTE 25: SHARE BASED PAYMENTS**

#### (a) Employee Share Option Plan (ESOP)

The CardieX Employee Option Plan was approved by shareholders at the 2005 annual general meeting and amendments were approved at the 2006 & 2008 annual general meetings. All staff are eligible to participate in the plan at the discretion of the directors (including executive directors) following recommendations from the remuneration committee, a sub-committee of the CardieX Limited Board of Directors.

Options are granted under the plan for no consideration. Options are granted for a 5-year period, and 33.3% of each new tranche vests and is exercisable after each of the first 3 anniversaries of the date of grant.

Options granted under the plan carry no dividend or voting rights.

When exercisable, each option is convertible into 1 ordinary share.

The exercise price of options is no less than the weighted average price at which the Company's shares are traded on the Australian Stock Exchange during the 5 trading days immediately before the options are granted.

Set out below are summaries of options granted under the plan:

#### 2020:

Grant Date	Expiry date	Exercise price	Balance at start of the year Number	Granted during the year Number	Exercised during the year Number	Forfeited during the year Number	Balance at end of the year Number	Exercisable at end of the year Number

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 29: CAPITAL AND FINANCIAL RISK MANAGEMENT

#### Capital management

The group's objectives when managing the Company's share capital, reserves and accumulated losses, which represents the group's capital, are to:

- safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders; and
- sustain future product development.

#### Financial risk management

The Group's activities expose it to a variety of financial risks: market risk (primarily currency risk), credit risk, and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group. The Group uses different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of foreign exchange risk and aging analysis for credit risk.

Financial risk management is carried out by the Chief Financial Officer (CFO) and overseen by the Audit & Risk Committee, a subcommittee of the Board of Directors.

### (a) Market risk

#### Foreign exchange risk

Foreign exchange risk arises when future commercial transactions and recognised assets and liabilities are denominated in a currency that is not the entity's functional currency. The risk is measured using sensitivity analysis and cash flow forecasting.

The Group operates internationally and is exposed to foreign exchange risk arising from currency exposures to the US Dollar and the Euro.

The Group's exposure to foreign currency exchange risk at the reporting date was as follows:

	30 Jun	ne 2020	30 Jun	e 2019
	In USD In EUR		In USD	In EUR
Cash and Cash Equivalents	785,161	101,153	172,041	434,484
Trade Receivables	541,829	43,971	643,898	107,881
Trade Payables	(244,354)	(5,685)	(186,323)	(1,208)

#### Sensitivity

Based on the financial instruments held at 30 June 2020, had the Australian dollar weakened/strengthened by 10% against the US dollar with all other variables held constant, the Group's pre-tax result for the year would have varied by \$143,409/(\$157,750) (2019: \$81,617/(\$89,778)). Had the Australian dollar weakened/strengthened by 10% against the Euro with all other variables held constant, the Group's pre-tax result for the year would have varied by \$20,743/(\$22,818) (2019: \$79,721/(\$87,694)).

#### (b) Credit risk

Credit risk arises from cash and cash equivalents, derivative financial instruments and deposits with banks and financial institutions, as well as credit exposures to customers, including outstanding receivables and committed transactions. The Group has no significant concentrations of credit risk. For banks and financial institutions, only independently rated and reputable parties are accepted. The Group has policies in place to ensure that sales of products and services are made to customers with an appropriate credit history. Terms of trade provided to creditworthy customers are between 30 and 90 days, whilst customers deemed higher risk arrange a letter of credit or prepay for goods. The maximum exposure to credit risk at the reporting date is the carrying amount of the financial assets.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### NOTE 29: CAPITAL AND FINANCIAL RISK MANAGEMENT (CONT.)

#### (c) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. The Group manages liquidity risk by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

#### (d) Interest rate risk

The consolidated entity's main interest rate risk arises from long-term borrowings. Borrowings obtained at variable rates expose the consolidated entity to interest rate risk. Borrowings obtained at fixed rates expose the consolidated entity to fair value risk.

#### (e) Fair value estimation

The fair value of financial assets and financial liabilities must be estimated for recognition and measurement or for disclosure purposes. The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values due to their short-term nature. The fair value of financial liabilities approximates their carrying values.

#### **NOTE 30: SEGMENT REPORTING**

#### (a) Description of segments

In the 2020 financial year, the Group operated in one operating segment, being sales of cardiovascular devices and services to hospitals, clinics, research institutions and pharmaceutical companies.

Management has determined the reporting segments based on the reports reviewed by the Board of Directors that are used to make strategic decisions. The Board generally considers the business from a geographical perspective and has identified three reportable segments by geographic area.

### Geographic areas are:

- Americas (includes global pharmaceutical trials business)
- Europe (includes Middle East and Africa)
- Asia Pacific (includes Asia & Australia/NZ)

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

# **NOTE 30: SEGMENT REPORTING (CONT.)**

#### (c) Notes to and forming part of the segment information

#### Inter-segment transfers

Segment revenues, expenses and results include transfers between segments. The group transfer inventory and finished goods between its group companies. Such transfers are priced on an "arm's-length" basis and are eliminated on consolidation.

### Segment revenue

There was no significant concentration of revenue attributable to one customer in 2020 (2019: \$NIL).

#### (d) Disaggregation of revenue

Revenue is disaggregated by the country in which the customer is located as this depicts how the nature, amount, timing and uncertainty of our revenue and cash flows are affected by economic factors.

- Held at date of resignation and ceased to be key management personnel in FY2019.

#### Performance Rights Held Key Management Personnel and Their Associates

Mr Craig Cooper holds 36 million performance rights which vest subject to a set of Milestones as follows:

	Number of performance rights	Will vest if 30 Day VWAP exceeds:	Expiry Date of Performance Milestone
Tranche 2	8 million	\$0.08	30/11/2021
Tranche 3	8 million	\$0.12	30/11/2021
Tranche 4	4 million	\$0.08	06/03/2022
Tranche 5	4 million	\$0.12	06/03/2022
Tranche 6	12 million	\$0.15	06/03/2022

Throughout the period the 8,000,000 Tranche 1 performance rights vested when the 30 day VWAP exceeded \$0.05 in March 2019.

#### **Employment Agreements**

Remuneration and other terms of employment for the CEO and the other key management personnel are formalised in employment agreements. Each of these agreements provide for the provision of performance related cash bonuses, other benefits including health insurance and car allowances, and participation, when eligible, in the Cardiex Limited Employee Share Option Plan. Other major provisions of the agreements relating to remuneration are set out below. All contracts with executives may be terminated early by either party with variable notice periods, subject to termination payments as detailed below.

#### Craig Cooper - Chief Executive Officer

- Agreement commenced on 1 December 2017.
- Base salary of US\$300,000 per annum.
- Reimbursement for reasonable expenses incurred in running the US business, paid on a monthly basis.

### Niall Cairns - Non-Executive Director

- Current agreement commenced with an effective date of 1 August 2019.
- Monthly consulting fee for strategic review and consulting services of US\$10,000 per month.
- Reimbursement for reasonable expenses incurred.

#### Jarrod White - Director

• Jarrod White is the principal of Traverse Accountants Pty Ltd, who holds an engagement with the Group covering CFO services, Company Secretarial services, and other general accountancy services.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### **NOTE 31: RELATED PARTY TRANSACTIONS (CONT.)**

#### Convertible Notes Issued to Directors and Their Associates

In January 2019, C2 Ventures Pty Ltd, a related party Mr Niall Cairns and Mr Craig Cooper, applied to the Company for 2,500,000 convertible notes at \$1 per note. Key terms of the convertible notes per the Convertible Note Deed (the "Deed") are as follows:

Term: 36 months

Currency: AUD

Drawdown date: 23 January 2019

Funds received: \$2,500,000

Interest payable: 6% per annum, accrued daily, capitalised quarterly

Conversion: Convertible to fully paid ordinary shares at a \$0.03 per convertible note

On 6 March 2019, 1,638,503 convertible notes were converted to ordinary shares, and a further 640,303 notes were converted on 21 November 2019, all at \$0.03 per share per \$1 convertible note.

The balance of the facility subject to conversion as at balance date was \$221,194 representing 221,194 convertible notes.

#### **Loans to Directors and Key Management Personnel**

At 30 June 2020 there were no loans to Directors or Key Management Personnel.

#### **NOTE 32: MATTERS SUBSEQUENT TO YEAR END**

Subsequent to balance date the Group announced the following material events:

- In July 2020, CardieX restructured its investment in inHealth and received US\$0.5m of the US\$3m Convertible Note, reducing the principal investment to US\$2.5m;
- CardieX signed a new Collaboration Agreement with inHealth resulting in a re-setting of the investment relationship between the entities;
- On 27 July 2020, CardieX completed a \$2.5 million placement from new strategic investors as \$0.03 per share with a 1 for 5 free attaching listed option (CDXO), resulting in the issue of 83,333,334 new Shares and 16,666,667 Listed Options.
- On 20 August 2020, AtCor Medical Inc, a CardieX Limited subsidiary, entered into a new contract for the lease of ATCOR devices and the provision of expanded data management services for Bayer's "AVANTI" trial. The extension of the contract is valued at US\$420k.

No other significant subsequent event has arisen that significantly affects the operations of the Group.

# NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

Payable later than one, not later than five years	9,870	13,818
Total lease expenditure payable	13,818	17,776

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2020

#### **NOTE 34: CAPITAL COMMITMENTS (CONT.)**

Leases now fall under AASB 16 and are presented in Note 21. Operating leases in the comparative period reflect lease disclosures under AABS 117. In the current year the Group has no short-term lease commitments, and one low-value lease commitment. Operating lease commitments includes contracted amounts for various offices and plant and equipment under non-cancellable operating leases expiring within one to five years with, in some cases, options to extend. The leases have various clauses. On renewal, the terms of the leases are renegotiated.

#### (b) Other capital commitments

There were no other capital commitments as at 30 June 2020.

#### **NOTE 35: COMPANY DETAILS**

### The registered office of the Company is:

CardieX Limited Suite 303, Level 3 15 Lime Street Sydney NSW 2000

### The principal place of business is:

CardieX Limited Suite 303, Level 3 15 Lime Street Sydney NSW 2000

#### **DIRECTORS' DECLARATION**

The Directors of the Company declare that:

- 1. the financial statements and notes, as set out on pages 20 to 67, are in accordance with the *Corporations* 
  - a. comply with Accounting Standards and the Corporations Regulations 2001; and
  - b. give a true and fair view of the financial position as at 30 June 2020 and of the performance for the year ended on that date of the Company and Consolidated Group.
- 2. the Company has included in note 1 to the financial statements an explicit and unreserved statement of compliance with International Financial Reporting Standards;
- 3. the Directors have been given the declaration required by Section 295A of the Corporations Act from the Chief Executive Officer for the financial year ended 30 June 2020;
- 4. in the Director's opinion there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable; and
- 5. the remuneration disclosures included on pages 15 to 18 of the Directors' Report (as part of the Audited Remuneration Report) for the year ended 30 June 2020, comply with section 300A of the Corporations Act 2001.

This declaration is made in accordance with a resolution of the Board of Directors.

**Niall Cairns** 

Executive Chairman Sydney, 31 August 2020

#### INDEPENDENT AUDITOR'S REPORT

To the members of CardieX Limited

### Report on the Audit of the Financial Report

#### Qualified opinion

We have audited the financial report of CardieX Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 30 June 2020, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the financial report, including a summary of significant accounting policies and the directors' declaration.

In our opinion, except for the effects of the matter described in the *Basis for qualified opinion* section of our report, the accompanying financial report of the Group, is in accordance with the *Corporations Act 2001*, including:

- (i) Giving a true and fair view of the Group's financial position as at 30 June 2020 and of its financial performance for the year ended on that date; and
- (ii) Complying with Australian Accounting Standards and the Corporations Regulations 2001.

#### Basis for qualified opinion

The Group's financial assets balance includes investments in convertible notes which are carried in the statement of financial position at \$6,028,392 as at 30 June 2020 as detailed in Note 17. Due to the investees being at their development stage, there was limited evidence available to support the carrying value of the investment. The economic uncertainty associated with the global COVID-19 outbreak has further impacted the availability of appropriate documentation to support the carrying value of the investment. As a result of the information not being available, we were unable to obtain sufficient appropriate audit evidence about the carrying amount of the Group's financial assets as at 30 June 2020. Consequently, we were unable to determine whether any adjustments to these amounts were necessary.

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report. We are independent of the Group in accordance with the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified opinion.

#### Material uncertainty related to going concern

We draw attention to Note 1 in the financial report which describes the events and/or conditions which give rise to the existence of a material uncertainty that may cast significant doubt about the group's ability to continue as a going concern and therefore the group may be unable to realise its assets and discharge its liabilities in the normal course of business. Our opinion is not modified in respect of this matter.

#### Key audit matters

Except for the matters described in the *Basis for Qualified Opinion* section and *Material uncertainty related to going concern* section, we have determined that there are no other key audit matters to communicate in our report.

#### Other information

The directors are responsible for the other information. The other information comprises the information in the Group's annual report for the year ended 30 June 2020, but does not include the financial report and the auditor's report thereon.

Our opinion on the financial report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibilities of the directors for the Financial Report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

#### Auditor's responsibilities for the audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website (<a href="http://www.auasb.gov.au/Home.aspx">http://www.auasb.gov.au/Home.aspx</a>) at:

https://www.auasb.gov.au/admin/file/content102/c3/ar1\_2020.pdf

This description forms part of our auditor's report.

# Report on the Remuneration Report

#### Opinion on the Remuneration Report

We have audited the Remuneration Report included in pages 15 to 18 of the directors' report for the year ended 30 June 2020.

In our opinion, the Remuneration Report of CardieX Limited, for the year ended 30 June 2020, complies with section 300A of the *Corporations Act 2001*.

#### Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

**BDO Audit Pty Ltd**
